in the city of Massillon,

For Sale at \$85.00 a Lot.

Splendidly located on Richville Avenue, at Kent street and Russell street, both sides of the avenue. Will be sold only in one parcel for half cash, balance secured. Consists of nearly sixty acres and allows for 5 lots to the acre with liberal margin for streets.

J. H. BUNNELL

76 Cortlandt Street, New York.

it May Do as Much for You. Mr. Fred Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years, with severe pains in his back and also his bladder was affected. He tried many so-called Kidney Cures but without any good result. About a year ago he began the use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to the cure of all kidney and liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c for large bottle. At Z. T. Baltzly's drug store.

HORR-HARYEY DEBATE.

Harvey Happy Over Proving 40 the entire civilized world has refused to Years' Silver Coinage.

HORR ATTACKS HARVEY'S BOOK.

He Calls Attention to What He Calls | 1874, taken from Mr. Harvey's book. Misleading Statements - Harvey Makes a Defense and Discusses Credit and Redemption Money-Other Points Debated. 1871 the production of silver has been

CHICAGO, July 24.—The seating capacity of the rooms of the Illinois clui in quantity three times during that pewas all taken up when the Horr-Harvey r.od gold had only doubled in quantity. debate opened. While the size of the Mr. Harvey took up the discussion of rooms does not permit a large audience, primary money as a measure of values. the officers of the club are compelled every day to refuse many applications for seats.

The day's talk was opened by Mr. Harvey. He said that the debate of the last session was of value as showing that during the past 40 years silver had been steadily coined in spite of the assertion to the contrary; that by the table copied from the reports of the mint the commercial ratio between gold and silver had been maintained at about the French coinage ratio of 151/2 to 1 for 200 years; that during the 22 years since 1873 as the result of demonetization, the commercial ratio had declined to 32 to 1; that in the 338 years prior to 1873 the quantity ratio between gold and silver had ranged from 56 of silver to one of gold, to four of silver to one of gold, and that during all that time the commercial ratio had clung closely to the legal ratio. During all that time the commercial price of sliver bullion had remained steady. Since 1873 it had steadily and rapidly decreased. It was the dominating influence of London on exchange to all parts of the world which led to gold being recognized by the world as the

ceeded to call attention to what he called misleading statements in Mr. Harvey's book. For instance he declared to be untrue the statement that it was believed that the cost of produc-ing all of the gold in the world was about \$2 per ounce, while some put it much higher. Mr. Horr pointed out that there had been a vastly increased

Again, Mr. Harvey had put the aggregate amount of silver in the world at about \$3,000,000,000. It was estimated that the silver in the way of the silver in the way of the silver in the way of the silver in the si mated that there was about \$6,000,000. 000. Mr. Harvey had said that the debts of the United States amounted to \$10,000,000,000. That was an absurdity. The statement of the amount of

silver referred to by him in his book as the amount available for coinage. He then distributed a table showing the they're staple goods. Our way is to production of gold and silver from 1792 to 1892, and proceeded to argue that, in spite of the wide relative fluctuations in production, there had been no flucruations in relative value till after the demonetization act in 1873. He then proceeded to argue that, except in the legal ratio of weight, there should be no oiftender quality of any money created.

Mr. Harvey's statements in his book. He took up the supposition that the government wanted 100,000 horses. Its competition would increase the value of hosres; that is free coinage of silver would increase the value of the bullion. Mr. Horr said that all the government did to silver was to put a stamp on the bullion and return it to the owner. Suppose the government should merely call for 100,000 horses for the purpose of affixing a brand to them, and, having done so, should return them to the owner, would that increase the value of the horses of the country? The horse

of the elements which govern the price of wheat, arguing that Mr. Harvey's

Mr. Harvey said that this government had fixed the price of gold and all the friends of silver wanted was for it to fix the price of silver, in the belief the nation could better keep out of the hands of the pawnbroker with two

of the debtor to pay in the cheaper metal should not be impaired. This would always maintain a parity. If the creditor were given the option of the money in which he should be paid, he would demand the dearer money, thereby increasing the demand for that metal and decreasing the other, thereby widening instead of narrowing the disparity.

gal 2 debate Replying Mr. Horr took up the question of farm tenancy, whose growth Mr. Harvey, at an early stage of the debate, had adverted to as a bad sign in our national life. Mr. Horr declared it a good sign and quoted from statistics gathered by the state of Minnesota showing the steady evolution of the tenant into the land owner, and from other statistics showing that the increase in the number of tenants had been accompanied by a decrease in the number of farm day laborers. The increase in tenancy had not been at the

day laborers. Mr Horr announced that before proceeding to the question of the production of silver he wanted to say a few words on the misleading nature of some of Mr. Harvey's statements on finance. He then attacked assertions made by Mr. Harvey as to the assessed valuation of the national banks. He then declared that Mr. Harvey was wandering lose of life.

from the question in debate, because he had several times declared that if the mints of the world would give free and mints of the world would give a material.

from the question in debate, because he

mints of the world would give free and

GOMEZ HAS OUTGENERALED HIM.

The Rebel Leader Has Raised the Revolt All Over Cuba, and Has Scattered the Spanish Forces-New Expedition Formed

HAVANA, July 24.-Since the news of the death of General Santocildes, on July 17, the authorities have had no news of Captain General Martinez de Campos, despite repeated inquiries to . Santiago de Cuba and other points. In 1867, he declared, all the money in The government fears that there is a circulation was \$18,28 per capita, and general uprising in the province of these times a'l money was primary money, the measure of values being Matanzas, which has been in a restless

when General Santocildes was killed has given an impetus to the revolution, especially in the provinece of Santiago de Cuba, where the iron miners have deemed to make them good, and they

joined the rebels. At every turn Gomez has outgeneraled Campos. Gomez has raised the revolt all over the land, forcing Campos to scatter his soldiers over a wide area. If Spain wishes to quell the rebellion she must prepare for a prolonged occupation of the island by a large force. A New York special says it is an open

secret in Cuban revolutionary circles that preparations are being made to send an expedition to Cuba at the earliest opportunity. It is generally understood that within the past day or two a suitable vessel has been selected and purchased by a

government with safety, only in such quantity as will not embarrass it in committee. The leaders of the movement in this city decline to discuss the subject. But the Cuban patriots who are not ide tified with the party as leaders have all heard of the purchase. The vessel is, according to reports, an iron steamer with a power of 15 knots an hour. Neither the name of the ves-sel, nor the port at which she is now She Accuses a Prominent Bradford Mar lying, can be ascertained. BRADFORD, Pa., July 24.-A pretty

▲ Former Saloonist Hauled His Stuff Away, Rather Than Risk the Threats Made Against Him-Another Saloon Blown Up Last Winter. ZANESVILLE, O., July 24.—The 400

residents of Batesville clad in nightgowns and other nondescript appar 1 gathered at 2 o'clock in the morning c view by lantern light, the wrecked saloon building owned by Luther Stewart of Barnesville, who had employed John Depew to keep it. The building and contents were com-

pletely rained by the explosion, the shock of which broke the glass in the surrounding ones. The loss on the building and contents is about \$1,500. The sentiment of the village is very strong against saloons, and E. L. Albert, a former saloonist, became so intimidated that he hauled h s stuff away. At Temperanceville, two miles distant, a saloon was blown up last winter.

ONE SIGNATURE GENUINE. A Startling Revelation Regarding Lewis

Transactions at Kenton. Kenton, O., July 24.—Attorney

Jesse M. Lewis of Urbana, who has been here for several days investigating an issue of bonds floated by Z. T. Lewis, the bond forger, has finished his work and left for home. According to the attorney's statement, duplicate committee on arrangements. All present Hardin county bonds to the amount of went home feeling that the day was \$32,000 are known to have been issued by Forger Lewis. One of the signatures to these bonds is said to be genuine, but the others are forgeries. There is alleged to be a large amount of duplicate bonds in this county affoat, possibly as much as \$100,000. The news of the existence of these bonds caused a flutter in financial circles, and some people became frightened and demanded their money from the banks. The panic soon subsided, however, and everything is now quite. There have been no arrests

Attorney Lewis states that Auditor Rutledge admits that all bonds issued by him during his terms as auditor were dictated by him, he signing his name to bonds and interest coupons. Z. T. Lewis would then forge the names of the county commissioners.

Cloudbursts Do Great Damage. BLUE ASH, O., July 24.—The village

of Brecon has been badly damaged by a cloudburst. Cattle and sheep were drowned. Many buildings were damaged and the barn of Calvin Morris to tally destroyed. At Summit in Clermont county. A HERD OF CATTLE IN A MIGHTY GORGE.

ns Tupper Belates the Pacts of a Singular Occurrence-A Grand Opportunity For a Daring Cowboy-Mining Mon and Sheriff-Cattle Thieves.

[Special Correspondence.]

La Hunta, Colo., July 16.—It was the story told by the mining engineer who had just come from the western congress at Telluride, and who had given me several strange stories about the Danites. This struck me as being one of the weirdest and most remarkable, and I will give it in his words as near as I can recollect them. "My grandfather knew John Lee, that Mormon fiend, intimately. I have of en heard him describe the terrible Mountain Meadew massacre in all its sickening and revelting details. He said it was one of Lee's tenets that robbing and killing gentiles was no crime at all. It was greed that cruel affair. The gentiles had splendid cattle and wagons, farming utensils, etc., on which the Mormons cast envious eyes. You know the latter were very poorly equipped in this line. So, as all the world knows, the Danites murdered | the gorge by means of the river?" one the helpless emigrants for the sake of) of the listeners asked. their goods and chattels. I am not going to rehearse the awful story, as every one knows it, but I want to tell you a curious sequel.

"After the massacre government troops were sent out to pursue and punish these Mormon assassins The latter learned that the avengers were on their track and fled into an isolated valley in Utah, near a stream which flows down from the Wasatch range into the Green river. It was a safe and remote retreat. rendered well high impregnable by the lofty mountains about them, and here they founded first a camp, then a settlement, which grew into a goodly sized town, now called Ashley. It lies near the Ute reservation, and the chief business of the place now is to furnish supplies for the Indian agency

A Fearful Sight. "Among these Mormon settlers was :

couning old dog named John Wyckliffe It's a wonder the great English reform er didn't turn in his grave at the acts of his name sake. This Wyckliffe was one of Lee's stanchest followers and a devout believer in the Danite's creed that all is fish that comes from a gentile's to a Mormon's net. Over in Wyoming at Henry's Ford was a magnificent herd of cattle of which Wyckliffe thought with thievish lenging. In 1874, I think it was, he made a night descent on this herd and carried away nearly 1,000 head. the pick of the lot. The owners of the herd, well known gentile cattlemen, discovered their loss shortly and set out on the trail of the Mormons with blood in their eyes. They traced the thieves to the Bear river, near where Blue mountain and Cross mountain loom up huge and defiant. Here occurred one of those wonderfully exciting scenes only known in the adventurous west. A trightful storm arose, which compelled the pursuers to halt and during which the stolen cattle, rendered frantic by the vivid

OVER THE BRING OF AN AWFUL GORGE

lightning and resounding thunder, stam peded The Mormons tried in vain to head off the infuriated herd. They might just as well have tried to sweep back the storm itself. The cattle rushed madly along, carrying horses and men with them to destruction. On they plunged and right over the brink of an awful gorge into the Bear river. Down went the whole herd, bellowing their terror through the rush of wind and rain. It was a fearful, a sublime sight, as one of the cattlemen told me afterward. Some of the cattle were not killed. You see, the first that went down formed a pillow for the last to drop on, and so the survivors crawled out of the debris and took up their abode in this maccessible gorge, where they have thrived and still rear, levend the reach of any man's hand. There is no possible way to get into this place unless you choose to be dropped down from the edge of the precipice at the end of a rope 1,000 feet

In a Prisen Banch.

"Men are preary adventurous out bere, but the boldest of them would besitate over this method of reaching these cattle. The rope might break, you know, and then, if you should once get down there, how are you going to get the cattle out's There is absolutely no! way of c-cape On all sides rise black frowning mountains, and at each end leaps and foams the neighty Yanapa, or Bear, river. There is nothing like it in the world. The place is atterly maccess. ible. The whole region of country hereabouts is the wildest and most insurmountable. It is 50 miles to the north of Meeker, the agency where the atrocious massacre by the Utes of the Meeker family and every one at the agency took place in 1879. There are several white men in Mecker who have seen these creatures, among them a famous guide and trapper, Coon Powell, who half has never been told." has frequently visited this place and

BEYONI) MAN'S REACH looked down from the lofty precipios upon the cattle roaming about their prison ranch. The Utes, too, know about them and have seen them. They are very wild and agile and will run like deer. They are small sized and number over 1,000-a mighty nice herd | Interviews With Local Residents - The for the adventurous cowboy who will solve the problem how to get near enough to lasso them and then how to get them out of their mountain pastures. They have lived well on the grasses of the gorge and have had plenty of water. In winter they have been sheltered by the lofty overhanging mountains. So they have thrived and waxed fat. And if of bones and skeletons at least 50 feet high to mark the place where the awful plunge was made. Those who have looked into this vawning gerge say that the effect of the black, jagged mountains, the mad, roaring, tumbling torrents and the huge pile of glistening bones, bleaching in the sun, is something infernal. But, at all events, it's you were to ask a Mormon about it, he | the Yankees' bones. I have often heard underlay all the preparations for that would tell you this is a fable, but the my uncle say it sounded just like it gentiles know better. Mormons naturally do not like to think so much valu-

> "Wouldn't it be possible to get into "It has been tried again and again,"

able property is lying useless and mac-

cessible through the knavery of one of

their most prominent men.

returned the mining agineer, "but you must remember that the Bear river is almost impassable. Its current is swift, its bed a mass of jagged rocks. It tumbles and plunges along and raises the very dence until it enters Green river. A boat or canoe could not exist long in those tumultuous waters. There is a legend among the Utes that a renegade of their number, who had stolen a Sionx woman for his wife and on that account was driven from his tribe, tried to reach this gorge by means of the river. He thought it a safe retreat from his enemies, and that he could kill and eat the fat beeves and make garments and a tepee from their skins. He made a rude cance, and taking his Sioux wife with him attempted the descent of the rapids. The canoe was snapped into chips and the adventurers lost. No, the bravest and most hardy, either white or Indian. will hesitate before trying to effect an entrance into that mountain prison."

"The only human being who could ever get in that place," stated the jolly. ruddy sheriff, who was one of the group, 'would be a Mexican cattle thief.' "Indeed?" laughed the mining man.

'And how would be manage it?' "I don't know," rejoined the sheriff,

"but he would get in some way. If that ranch were in the southeastern part of Colorado instead of the northwestern, the greaser thieves would sneak in in some fashion.'' Then the company in the Santa Fe

sleeping car urged the sheriff to tell what he knew of the haunts of the Mexican cattle thieves. "What I know would fill a book," he

answered, "and I don't want to tire you out. I'll only give you a personal experience or two. The greatest pest of Colorado cattlemen is the Mexican cattle thief. They sneak over the border at night and carry off the finest yearlings they can lay hands on. They live in communities, are usually connected by marriage and will swear to anything to help each other out of a scrape. There vas the famous Archibta gang. Archileta was a typical greaser thief who lived down in the Huerfano country. His brothers-in-law, sons and cousins were of the same stripe as himself. They were the scourge of that region. For a long time the finest, fattest beeves had been disappearing from this and tons. Visitors from the north took them that ranch, and suspicion pointed toward away as relies. It is a little curious that these lazy, worthless Mexicans.

Mexican Thieves. a couple of deputies, determined to capture the thieves if that were possible. It was dusk when we came to the tum- i trying to entertain visitors, but it won't ble down dobes where the gang lived. They were not at home. We went into the first year after father's death plowed an out of door cellar and there found a . down all the breastworks in the fields, quarter of beef with the brand of a well | and some that was timber then has been known company on it. We waited: I found it true that I could trace no until the crew came home and took them, regular line. In the woods, the breastinto custody. Archileta was a powerful fellow who had sworn he would never be taken alive, but he submitted to arrest when he found we had called the turn on him. His wife, however, made ' a terrible scene, trying to stop us and threatening in the most flery language to do me up. However, we got our prisoners safely to the neighboring town, and Archileta is now in the penitentiary

at Canon City. "Another time I was on the trail of a notorious thief, having followed him all day, coming up to the ruined dobe where he lay hidden just as the moon rose. He knew me, and leaping on his horse started for the river. After him I rode, hot and fast. He took the stream, him my horse and I went. I followed him across, back again to the other shore and then across once more. Two or three times I shot at him, but missed him. He got away from me, and I must say that a feliow who will make such a desperate break for his liberty as that Mex. ican thief did almost deserves 2 And he displayed such courage and resource and get into that walled ranch above Meeker if he lived in that neighborhood

Mexicans, however, rarely get so far north in Colorado. They are too lazy, and then they can do business right along on the border. Then the mining man and the sheriff fell to discussing free silver, while I, looking out of the window at the snowy peaks rising in the distance, decided

that the west is full of stories yet. "The

EDITH SESSIONS TUPPER.

MR. BEADLE AT THE SCENE OF A BLOODY BATTLE.

Bloody Angle-General Grant's "Hammering" Process-A Few Comments on

[Special Correspondence.]

SPOTTSYLVANIA COURT HOUSE, Va., July 15 .- "You are now in the northeast corner of the bloody angle," said my host, Mr. E. L. Landrum, "though ever one gets at them he will have a our fellows called it the bloody bend. very good thing. There is a great heap The McCool house just back there was the main center of the angle, and beginning at this pine tree, off that way ter a hundred yards or so, the ditch was filled three deep with the dead. You see, the Yankees broke over and were then driven back, and for awhile both sides fought over the same breastworks until some of our batteries got the range of the Yankees' side, and as the cannon the most remarkable cattle ranch in the shot swept along down it our fellows world and well worth a description. If I could hear the crash as they splintered would if you had thrown a big rock into a pile of glass and china. And every time the battery swept the duch there was a scream, and the cle pile writhed and twisted 1.1 worms. Our fellows say t . I the wore inst like devils that day-a. It care for life, their own or anyl are elses, They charged right up against the can non and fought hand to hand and knocked each other down with their Death and Dotruction.

"And where were you?"

"Oh, we had warning and ran down to the Court House. I was only 12 years old then. Our house was first taken for a Confederate hospital, and when the Confederates fell back and the Federals came on the whole place was swept clean. All the horses were run off or killed, and a big herd of cattle were killed and everything else in the live stock hue. Our house was shot all to pieces, and the furniture destroyed and the fragments taken to build breastworks, but the strangest thing was about the feather beds. When my sister and I came back, we walked along the breastworks, and she saw a piece of the ticking sticking out, so we went to work and dug and pulled and got every one of our seven feather beds out of the breastworks. What the Yankees put them in for I can't imagine, but right along there, though it wasn't the hardest fighting, you could walk 100 yards

or so on dead bodies. This pine thicket was then an open field, but it has grown up thick enough since All this field was a graveyard. The first years I worked the farm I plowed up six skelewhere visitors used to come at the rate of 1,000 a year or more they stopped "At last I started out overnight with | all at once a few years ago, and now there is hardly ever one. I thought some of making a sort of tavern and do now. The man who had the place

> works are still intact, and trees have grown upon them a foot in thickness. with great masses of brush and tangled vines. The interior breastwork, constructed by the Confederates after an entire division of them had been captured at the outer angle, is now scarcely visible at all. Striking westward from the McCool house, on a sandy ridge where the land was so poor that it would make a western man sore eyed, I found a little the worst looking negro settlement I have yet seen in Virginia It was, in fact, the old plantation quarters, but the mansion of the master long ago disappeared, and the cabins look as if they were sinking into the earth. I tentured to the door of one and found

and his horse struck out holdly. In after - it dark inside as the den of a wild beast. Relics of the Conflict. The negroes were so stupid that I could understand them only with great difficulty, but they had a curiosity to show me what they had recently plowed up—a human jaw and arm bone. The law was one of enormous size, and nearly all the teeth were in tolerable preservation. Not far beyond Mr. G. W. I believe he would swim the Bear river Perry showed me an army medal or bronze badge recently found near his house. A little scouring brought out the original inscription and a rude scratching, perhaps made by the owner. On one side were the words, "Against rebellion, 1861," inclosing a starred shield on which was the word, "Union;" on the other side, "W. H. Jackson, Co. D. 19th regiment, Mich. Vols., Somerset A few rods north of Mr. Perry's and perhaps 21/2 miles northwest of the courthouse is the Sedgwick monument, and there was the northwest corner of

AT SPOTTSYLVANIA. | the bloody field of May 19, 1864. General Sedgwick was killed on the 9th, but the awful slaughter of the 19th completely overshadowed minor engagements in which from 2,000 to 6,000

> I was considerably moved by the pathetic story of Mrs. Catherine Trigg, who still lives on the battlefield and whose son was killed a few days after the battle by the explosion of a shell. All the boys who had ventured back to the neighborhood were busy gathering shells which they opened for the powder, and sometimes lead, which they contained. Finding it difficult to open a very large one in the usual way, young Trigg tried it with a hammer and cold thisel. It exploded, and he was torn to

"He was only 16 years old," said Mrs. Trigg, "a." intended to go in the army if the war continued, but was cut off. He and Mr. Landrum had opened many and thought they could do it safely. We hurried back right after the battle. In fact, we followed on the heels of the army, for we knew there would be no more fighting, but the awful stench dreve us away again. There come on heavy rains, and after that nearly everybody was sick. In fact, all the rest of that year was the sucklest ever known, for this is a very healthy coun-A Lucky Individual.

At one point was a Confederate regi-

ment mostly from West Virginia, and of the company on the extreme left all were killed or wounded but one, as there was a sudden enfilading fire from the Federals. Monroe Hansford, the lucky man, has had an extraordinary career and is still living. I did not see him, but his brother gave me this account: "Well, I reckon if this world was to break in pieces Monroe Hansford would manage to get on the biggest and come out alive. He has been mighty near death in every sort of way, by boats sinking or exploding and in shooting and cutting scrapes, and in the Wilderness he put up his own headstone and lived to tell it. They were ordered to lie down till the Yankees came close up, and the lower half of his body was in a little gully. Seeing a big flat stone near him, he picked it up and held it up edgeways just in front of his head. It was struck by six or seven rifle bullets, and the men to the right and left of him, three or four each way, were killed and all the rest wounded, but he escaped."

The Sedgwick monument was put up on the 12th of May, 1887, and for three day a large concourse of survivors of the old Sixth corps rambled over the various battlefields in the vicinity. All the neighbors with whom I talked did not fail to inform me that the Battlefield association paid Mrs. Owens \$50 for the acre on which the monument stands, which is from 5 to 50 times as much as the current price of land anywhere in the region. All the historians say that no one can understand these Wilderness battles or comprehend the reasons for Grant's attack on May 12 unless he comes here and studies the ground. Well, for myself only I must say that after walking all over the field I can see how they fought, but as to reasons for this battle I know what I did before—just nothing at all. I do not wonder that popular opinion through all this section of Virginia is unanimous in regard to the Federal commander. This was the last battle save one in which he hurled his vereians headlong on strong breastworks manned by expert riflemen. A Remarkable Fact.

The "har mering" process, of which some writers still speak approvingly. was begun May 4 by order of General Grant and terminated June 3 by order of his soldiers. It lasted just 30 days, and the Federal losses averaged 2,000 per day. The Virginia estimate, therefore, is that had that policy been continued it would have cost 300,000 men to take Richmond. Measured, however, by the time in action the loss per hour increased at an almost geometrical ratio. Thus at the last desperate charge of the so called Wilderness series twice as many men were lost as in the first: at Laurel Hill the loss was doubled again, at the bloody angle nearly doubled again and at Cold Harbor the loss was between 8,000 and 9,000 in half an hour. or at the rate of 17,000 per hour. Then, the only case recorded in history so far as I know, a whole army without previous understanding unanimously refused obedience The order for another charge was given, repeated by corps and division commanders, and so on down the line of officers. The trumpets sounded the charge. The whole army stood still. It should not be forgotten that it was not the general who stopped the "hammering" process by his own will. It was the private soldiers who did it, and a most remarkable and dramatic

circumstance it was. McClellan reached the James river with a loss of 19,000 and inflicted a loss of 21,000 on Lee. Grant reached the same place with a loss of 60,000 men, inflicting a loss of 23,000 on Lee. At that point both proposed the same plan. In 1862 it was rejected, and in 1864 it was accepted. McClellan did not venture to promise that Richmond could be taken by his plan in less than six months, and his proposition was ridiculed accordingly. Grant did it in nine months. If this were all, we could quickly decide the old contention as to relative rank of the commanders of the Army of the Potomac, but there is a deal more. Grant was always respectful to his superiors. McClellan often grossly insulting and generally contemptuous. Our civil war cannot be judged by old world standards, for the political fights were, if possible, even more important than the military. The administration could drive on the soldiers or trust buildog generals to do so, but it had to satisfy the men who supported the war. In 1861 and 1862 these men were fiercely impatient of delay and timid as to loss of life, taxation and expenditures. In 1864 they were in the humor to spend every dollar, sacrifice every man and to go to any length necessary in winding up

J. H. BEADLE.

MOURNING COSTUMES

men were killed, wounded and captured.

Latitude Allowed In Trimming and Making Capes and Cloaks-Hats For Young Persons-Lingerie For Half Mourning-A Handsome Afternoon Dress.

[Special Correspondence.] NEW YORK, July 15.—There are A Few Prices Follow:

modifications even in mourning, and though the line has always been drawn strictly in widows' garments, particularly for first mourning, much more

latitude has been allowed for the young

in the way of trimming and make. It is most depressing to wear mourning garments at the best and to be in company with those whose somber habiliments tell of recent bereavement, and while a little judicious ornament or elaborateness in the application of the crape does not show disrespect for the dead it is certainly less depressing for the wearer and beholder than the hard lines heretofore deemed necessary. Widows still wear the close bonnet

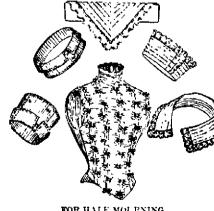

with its white cap that tells its story of

the wrench that tore apart a loving conple. Some widows wear white mull strings to their bonnets or stiffer book nursim tied in set and rather stiff hows. under the chin. Others have black strings, but generally speaking the white ones look the best. The verl is long and heavy and for the first two months should be worn over the face. The gown may be and often is entirely covered with English crape, which is the only kind suitable or indeed ever used for deep mounning, or the gown itself may be of endora cloth, silk warp henrietta, cr where these goods are too expensive a very fine black cashmere can be used. But cashmere is too soft to look well with heavy crape. The old bombazine was good, but has few adherents on account of its weight. The silk warp fabrics have just the right weight and firmness. The dress, then, for first monrning may be of eudora and have the crape added to any depth or amount, and later the crape may be removed, leaving a perfect dress, quite elegant enough for any occasion and still be a mourning gown by association with the always present veil. Shorter veils may be worn after six months for ordinary occasions, but for church or any other similar need the long veil is de rigueur. Capes and cloaks follow the fashion

of the day in form, but are always trimmed heavily with crape and sometimes lusterless ribbon The Lady of truly refined taste will not use glittering jet on any article of her attire. For the grown daughters who have

lost a parent there are handsome gowns which are sufficiently ornate to please any taste without being frivolous. The oldest daughter wears a veil hanging from the back of her bonnet as long as she wishes to have it, with a fine net veil with an inch wide crape border over the face. She can have ribbon or crape bows and a few black flowers or dull wings. The dress for first mourning may be laid in panels with crape and eudora alternating, or her whole dress may be of crape with insets of cloth at the bottom of the skirt. Her waist may be blouse shaped of crape, with its combination slightly ornamented with dull jet. These matters are generally left to the dres-maker and the individual taste of the wearer, but in any case the combination is always sharply marked. Black crepon and lisse ruchings are frequently seen at the necks and wrists of mourning gowns. One home gown which was made for a second daughter had a plain skirt with an inset panel of crape, the rest being silk warp henrietta. The vest front was crape, with revers of the dress goods wrought with fine dull jet. The collar was the same. Beneath the revers were the short falls of embroidered silk crape. Small cuffs added a touch of dressiness.

In lingerie for half mourning there are sheer muslin collars and cuffs stitched with black and edged with crepe lisse rufilings, white or black. Some collars for home wear have quite

large "bandkerchief points" on each

side. These may be tucked or hemstitched. There are also cuffs and collars of black linen stitched with white thread. These are for wear with close finished gowns. For a handsome afternoon dress for one young lady were a skirt of black crape and a neat Eton jacket of eudora with crape revers and crape sleeves. To wear with this there was a vest of puffed white crape with a multitude of small bows of narrow black gauze ribbon all over the front. The open jacket showed them, and it was pretty. OLIVE HARPER.

well-deserved reputation as a healer of diseases among the people; the taird, is to earn a modest com pensation in order to properly care for him-self and family He does all that he agrees to, and oft-tim's more, and when failure does occur it can always be traced to carelessness, imprudence, or over work on the part of

work on the part of the patient.

He deals candidly, liberally and honor-ably with all alike, taking advantage of none as to condition or circumstance.

Last, but not least, he cures after all he cures after all methods but his have failed.

DR. H. LESTER KUTCHIN.

COLUMBUS, OHIO. EX. U. S. SURGEON.

Specialist in Chronic Diseases.

their lives, or give up their last dime for medicine. He does not take patients under a so-called false guarantee pretending to charge only for medicine and taking whatever amount he can get, or make the object of his life to extort mon-ey from the sick.

HUNDREDS OF SO CALLED INCURABLE CASES CURED!

Thousands of Men after year owing to the vital fluids passing off with the whipped of energy and ambition, but are all unconscious of where the true cause of their trouble lies. Seeking relief from the family doctor, they are treated for Billousness. Dyspepsia, Heart Troubles or Rheumatism and Kidney Disease, but to no purpose. They try patented nostrums, but these disappoint them. These sufferers may be of all ages, from mere boys to advanced life, but the majority are middle-aged married men who have worked day and night, as you might say, for years and years. If such will come to the Doctor, and bring a bottle of their urine, he will show them the cause of their trouble.

The Chronic Afflicted in order to have the skill of the Noted Specialist, must either go to such specialist, or the Specialist must either go to such specialist, or the Specialist must either go to the larger cities to receive treatment: this fact is owing mainly to: The terrible dread the sick have of leaving home and going into the turmoil, noise and confusion of a great city, and the worry and exhaustion incident to travel. Also the great expense of the trip and the unreasonable prices charged for examination and treatment. It is a notirious fact that chronic diseases are so distinct from acute ones that the regular practitioner as a role with present and the stream of the contraction of the stream of th prices charged for examination and treatment. It is a notorious fact that chronic diseases are so distinct from acute ones that he regular practitioner, as a rule, wants nothing to do with them, and if satisfied with his income, will frankly say so, hence the necessity of the specialist; and that he shall put himself where those patients uncured by their family Doctor may see hem and receive first-class treatment, although unable to visit the city to secure a like quality of skii. The fact that a city specialist vivits your county seat, and receives and prescribes for patients at your best hotel does not in the least detract from his skill, honesty, integrity or respectability. For if a man is a gentleman at home he is a gentleman everywhere. Does Dr. Kutchin cure everybody? No! Does he treatevery case that goes to him? No! But he does cure a greater percentage of cases accepted for treatment than any specialist of our acquaintance. His business has assumed such gigantic proportions in Ohio that he has found it an absolute necessity to confine his work almost entirely to this State. This enables everyone under his care to communicate with or see the Doctor on short notice at all times.

TOR. KUTCHIN IS NO STRANGER IN THIS COUNTY HE HAS BEEN MAKING REGULAR VISITS HERE FOR THREE YEARS.

13 SPECIAL NOTICE.—In all obscure diseased conditions DR. KUTCHIN requests the afflicted to bring a sample of urine for tree analysis. This should be the first passed on arising. Let the afflicted remember that Dr. H. LESTER KUTCHIN visits this country regularly every month for the convenience and benefit of his patients. He can be consulted FREE of CHARGE in his private parlors at the

Hotel Conrad, Massillon, Friday, Aug. 9, '95

Consultation, Examination and Advice, Free. Return visits made every 28 days.

THERE WERE HOLES IN THE SOCKS OF MR. B.

And Led Mrs. B. to Defend Herself by hind your shirt bosom to make it puff Go Down With Her Husband-Just Like

Mrs. Bowser sat by the front window waiting for Mr. Bowser to come home to dinner. She saw him when he dropped off the car, almost a block away, and she knew by the way he struck the ground that something was wrong with him. He came down the street with his shoulders humped up and his hat pulled down on his ears, and as he ascended the front steps his scuff! scuff! scuff! was a warning that a row was at hand. "What is it, dear?" asked Mrs. Bow-

ser as she opened the door for him. Mr. Bowser made no reply. He sort of dodged out from under his hat and let it fall and roll down the hall and then proceeded on to the family sitting room and sat down on the couch with a weight that jarred the chandelier.

"Anything wrong, dear?" persisted Mrs. Bowser, who had dutifully followed him up. Mr. Bowser untied and kicked his

shoes across the room, and holding up his stockinged feet to her gaze he hoarsely whispered: "Look there! Holes, Mrs. Bowser-

holes in my socks!"

"Yes, I see 'em," she calmly replied. "You woke up ten minutes late this morning, and when I heard you rushing around I wondered if you wouldn't make some mistake. You see"-

"Yes, I see," he interrupted. "I see holes in the heels and toes of these socks -holes which have set me almost crazy all day long. That's the sort of a housekeeper you are. That's the kind of interest you take in your husband's comfort and welfare. Nice thing if I'd met with an accident and been taken to a hospital, wouldn't it?'

"Where did you get those socks this morning?"

"Where! Why, out of the bag in the closet, of course. You don't suppose I went up on the roof looking for em, do you, though they might have been there for all you knew.'

'Mr. Bowser, I put those socks away three days ago to prevent you from getting hold of them until I could look them over. Why on earth you should go to all that trouble when you have four or five pairs in your bureau drawer is more than I can tell."

"Four or five pairs in my bureau drawer!" he shouted. "Never! Not a pair, not a sock, not even the heel of a sock. I looked there, but nothing was to be found but an old hairbrush. If this house was run on a system, Mrs. Bowser; if it wasn't left alone to run itself, I might find at least one pair of old socks without wasting half an hour's time to look for them, but I've given up all hope. Is it any wonder I have corns and bunions and varicose veins and rheu matism? Is it any wonder I limp and hump and halt and go about like a man 100 years old?"

For reply Mrs. Bowser went up stairs and returned in a minute with five pairs of clean and almost new socks and held them up for him to look at.

"Yes, I know!" he said as he turned his head away. "Probably had 'em under your pillow or hung up to the ceiling. I'm neither cross eyed nor nearsighted nor an idiot. If those socks had been in my bureau drawer, I should have found 'em.'

"They were right there, Mr. Bowser. You've had that same drawer for the last ten years, and there's never been a time when you hadn't clean socks in

"Woman!" cried Mr. Bowser as he rose up, "am I the head or the foot of this establishment? Am I your husband or the man who cuts the grass in the yard?"

"You are the head of the house and my husband," replied Mrs. Bowser.

"Then treat me as such! No wife should dispute her husband. When I say there were no socks in my bureau drawer, I say what I know, and it's not for you to stand up and talk back. If that were all-but it isn't! Look at the way I'm all humped up like a blamed old camel! I haven't had my feet on the ground today.'

"Your trousers are too short," said Mrs. Bowser as she stood off and looked at his ankles.

"Don't Iknow it, and how came they too short? Yesterday these tronsers were all right; today they have been lifting me off the earth! I found 'em in the

bag with the socks, I suppose!"
"The matter is that you've buckled up your suspenders too tight. Why didn't you let 'em down?"

"Yes, why didn't I do this and why didn't I do that?" he growled as he walked back and forth and kicked the chairs aside. "T'll give \$10,000 reward for the arrest and conviction of the fiend who got up in the night and meddled with my suspenders! But it isn't socks and suspenders alone, Mrs. Bowserlook at this collar!"

"I've been looking at it," she replied. "You woke up late, dressed in a hurry, swallowed your breakfast before I got down, and the fact is you hadn't half dressed. Your collar wasn't buttoned behind, and as a consequence has been up around your ears all day. Turn

around here. No: it isn't buttoned." new wife. "Why, she has a face that fore her and drew himself up. "Is my would stop an amateur elecutionist."—head filled with sawdust? Haven't I Cincinnati Tribune.

MR. AND MRS. BOWSER | enough common sense to button a col-

"Nobody got up in the night, but you got up in the morning," she said as he paused to find words to finish his sen-"You must have something be-Producing Some Evidence, but It Didn't out that way. Well, if that isn't just

She held up a towel before his eyes and gave it a shake, and his face turned from red to white and back again as ha

"Mrs. Bowser, how-now did that towel get-get behind my shirt?"

"You put it there, of course. Have you any old hats, shoes, hair brushes or brush brooms hidden away under the back of your vest or in your pockets?" "Woman-woman"

"Yes, I'm a woman. You didn't turn the sleeves of your coat wrong side out when you put the garment on, but your rest isn't buttoned up right, and you've put your glasses in the wrong pocket. What's this in your shoe, Mr. Bowser?" "In—in dy nico?"

"Yes, in your shoe. You were limping as you came down the street. Here's one of your shirt studs, and it's been digging into your heel all day. Didn't it occur to you to take off your shoe?"

Mr. Bowser stood and glared and realized that he had the worst of the argument. It wouldn't do to acknowledge t, however, and so he pulled himself together by a great effort and said:

"Very well, Mrs. Bowser-very well! I see how it is! I understand this little business right from the beginning, and no matter how painful it may be to me it is my duty to-to-to"-

"To come down to dinner," she said as the lump in his throat choked off his

words. But he wouldn't. He picked up his shoes and went up stairs instead, and in Morgan in telling me the story of his regoing up he kicked every step, and in markable experiences, "I was sent with a closing the door of his room he banged it with such force as to make the house tremble. And Mrs. Bowser sighed and smiled and said to herself that it was just like a man.-M. Quad in Detroit Free Press.

The Darkies' Drinking Match.

Three country "darkies" came to the city the other day and stopped in at a restaurant on Seventh street, near Grayson, to get something to eat. The proprietor of the place was in a waggish mood, and he decided to have some fun at the expense of the country visitors. A large ico chest stood at one end of the counter. It had glass doors, through which beefsteak, vegetables and fruit could be plainly seen. At the bottom of the chest was about an inch of water. which came from the melting of the ice above. A rubber hose was in front of the chest to lead off the water when it reached a certain height. But behind the chest was another pipe, connected with a hydrant, to be used to wash out caught the next day on the Chickahominy the chest when needed. The proprietor and carried back to Libby. They confined of the restaurant told the colored men he would give them \$5 if they would drink all the water that remained in the bottom of the chest. They jumped at the proposition when they had examined the chest and saw that there was only about a gallon of water there. The smallest of the three went for the water first. He lay down on the floor and put the end of the hose in his mouth and drank and drank until his eyes bulged and he looked weak. When he could drink no longer, he arose and looked into the chest. It did not appear that the water had receded from the sides a particle. He concluded that he had not drunk as much as he thought he had, and he tried it again. Each of the three colored men tried this experiment three times, and it did not seem that any of the water had gone out of the chest; in fact, as one of the colored gentlemen

exclaimed: "De watah am certainly risin." This was true. The proprietor's waiter had turned on the hydrant faucet lightly when the men began drinking. -Louisville Courier-Journal.

TOLD BY FAMOUS MEN.

Five Escapes From Rebel Pris-

HON, C. H. MORGAN'S EXPERIENCE.

Congressman Cobb Relates His Adventures After His Capture at Gettysburg.-The Man Who Got Stuck In the Tunnel-A Postponed Signal.

[Copyright, 1895.]

There was a time when Representative Morgan of the Fifteenth district of Mis souri was the most famous private soldier in the war of the rebellion. He was known from one end of the country to the other as "The Escaper," and perhaps a greater number of lies has been told about his exploits than about any other private soldier of the Union army. Morgan, though naturally a modest man, began finally to believe there was no prison strong enough to hold him. He was such a slippery customer that when his fame in that line began to be noised about usually a company of soldiers were set to watch him, and as a captive he was of more cost and trouble to

with their liberty on the Federal side of the line. Five times did he escape from rebel prisons, and four times was he re-

captured. "The first time I was taken," said Mr. lot of other prisoners to Libby prison. I had not been there very long before I began meditating plans of escape. While knocking around in the room where we were confined I discovered that the chimney led down to an unoccupied room in the basement. The guards apparently had no suspicion that we could reach the basement by the flue, but we did, climbing up through the fireplace and then slipping down the chimney. By working quietly and in regular relays we were able to dig a tunnel from this basement under the foundations of the building across the street and into an adjoining open square. We had some trouble in disposing of the earth taken out of the tunnel, but piled most of it up in the rear of the basement room. By careful management we kept up our tunneling for several weeks without attracting the attention of the guards. On the appointed night Colonel Strait and 125 men passed safely through the tunnel and out the other end, where the opening was concealed from view from the prison by some bushes. It was a very successful break, but only about half of us succeeded in getting safely to the Union lines. I was

half rations. Before night I had a hole through the floor above and was in communication with my fellow prisoners up stairs. They shared their meat and tobacco with me. I had just laid my plans for another escape when the authorities concluded to transfer us to Macon. We were six days on the journey, which we made in box cars. On the way several of my companions and myself cut a big hole through the bottom of the car, notwithstanding the fact that several armed guards were in the car with us. The noise of the train helped us, and we kept up a singing and shouting as we worked. When the train stopped in the night, we slipped through the hole and got away. This time I was out a week and really thought I had succeeded in making good my escape. I had got clear of the Confederate lines and was right opposite our own army when a rebel skirmishing party came up and caught two companions and myself. We were sent to Macon.

"I did not have the pleasure of escaping from the Macon prison. We did have a tunnel dug under the walls and were about ready to disappear when our plans were exposed by some one on the inside, probably a Confederate placed among us for the purpose of giving away our schemes of escape. I was next sent to Camp Sorghum, as it was called, at Columbia, S. C. The name was derived from the rations given prisoners there-corn bread and sorghum molasses. One day a few of the boys and myself made a break and succeeded in getting through the lines, but were all taken the next day. Later I made another break, having for companions Captain Ewing and Captain Baldwin, the latter one of my congressional chums in the house. He is a member from Minnesota, you know, and right glad were we to discover one day while sitting out in the lobby taking a smoke that we had been companions on that daving though unsuccessful effort to get away from our good friends, the Johnny Rebs. We got along famously after giving them the slip this time and thought we were going to reach the Union lines. But at the end of the third day Ewing broke down completely, and we staid by him and were caught and sent back. "My fifth and successful attempt to es-

cape was made from a moving train. We were being taken by train to arlotte, N. C., and two other prisoners and myself cut a hole through the bottom of the car. At the first opportunity we slipped through the opening and made a run for it. The night was a very stormy one, with snow and sleet. None of us had any shoes, and I was bareheaded, having lost my hat in getting away from the car. We were thinly clad and were weak from long subsistence upon prison fare. We had gone a considerable distance through the storm when our strength gave out, and we agreed that we could not travel a mile farther. We knew that pursuers were not far behind us, but we felt obliged to succumb to our fate. At this moment we came upon a negro cabin, and when the immates responded to our knocks we told them who we were and what straits we were in, and they took us right in. They gave us warm food and drink and good beds When the Philadelphia Times.

pursuers came up, our colored friends plandly informed them the escaping prisoners had been seen running down the road as fast as they could go about half an hour before. By the help of these kind negroes we finally managed to reach the Union lines." In Federal Prisons.

Congressman Cobb of Alabama, the pro-pounder of the famous question, "Mr. Speaker, where was I at?" has related his: experience after his capture in the battle of Gettysburg, and it is an exceedingly interesting story. He was the first lieutenant of a company attached to the Texas division under Longstreet. "The second day of the fight, July 2, 1863," said Mr. Cobb, "I was cornered by the enemy in the course of the engagement. On the side of me was a steep, almost perpendicular, slope. On the other was a wood of heavy timber and thick underbrush. I failed to hear the order for retreat, and before I knew it I was surrounded and captured. I was first taken to Fort Henry, Baltimore harbor, then to Fort Delaware for three weeks, and after that to Johnson's island, where I staid from the 1st of August until the February following. At that time there was a call for 600 of us officers to be carried to Point Lookout at the mouth of the Potomac. We were joyful over the transfer, as we thought it was made for the purpose of exchange, and as a matter of fact 200 were exchanged.

"We were eventually crowded out by the wounded men brought in from some battle and were then carried back to Fort Delaware. Soon after our transfer another call for 600 men was issued to go to Charleston barbor to be made the subjects of retaliation. The Federals charged that Federal prisoners in the hands of Confederates had been kept within range of Federal batteries and thus exposed to the shots from their own men. Whether this was true or not I do not know, but they took me and about 600 other prisoners, among them Speaker Crisp, and placed us in a position between Federal and Confederate batteries, where we were exposed to the shots of both sides. The shots would fly over us occasionally. I don't remember that any of us was injured, but it was certainly not pleasant to be constantly expecting a stray shot to drop among us. After this ordeal our party was separated, some of the 600 being sent to Fort Pulaski and the remainder to Hilton Head. I was among the latter and was some time afterward transferred back to Fort Delaware, where I remained until the cessation of hostilities.

"I never saw any particular case of cruelty in the prisons in which I was confined. The guards shot several prisoners at Johnson's island, but I guess they brought it on themselves. There were severe punishments for insubordination-as, for instance, when privates were tied up by their thumbs and officers were tossed in blankets. I helped to bury many a poor fellow. Sometimes as many as four or five were buried at once. Their death was not the result of bad treatment, but of wounds they had received in the field or of confinement or homesickness. The winter I spent at Johnson's island was very severe, the thermometer registering sometimes 15 to 20 degrees below zero. On New Year's day of this year five men attempted to escape through my room. They took two of the benches which were in each of the rooms and made a ladder by nailing pleces of wood between them, by the assistance of which they made their escape through the window. Ordinarily there were sentries stationed about every 300 yards, but this night was so bitterly cold that they could not remain on post. The five succeeded in leaving the prison, but one succumbed to the cold before he had gone a mile and was brought back the next morning with his ears, toes and fingers frozen. Three others were found at different distances near the fort, unable to proceed farther on account of the cold, and were recaptured. The fifth escaped to Canada. "Several other efforts to escape were

made by the prisoners, with better success than the one I have just related. One time a party occupying the hut nearest the fence took the floor up, dug under it and tunneled under the fence, carrying the dirt off in haversacks. This was a long and tedious job, but it was finally finished. On A large number succeeded in making a safe transit, but one large, fat fellow got stuck where the tunnel turned to go upward and could neither retreat nor go for ward. His comrades tried to push or pull him through the tight place, but without avail, and he had to stay there. He was a nervy fellow and made no outcry, remaining there all night until next morning, when the guardsman discovered him lodged in the tunnel. His fellow prisoners thus had a good start, and about half of them made good their escape. The others were recaptured." WALTER WELLMAN. recaptured."

African Mushrooms. There is a French story of some travelers in Africa who, while on an exploring expedition, ran out of supplies. By chance they came upon a native but, but it was empty, and the only visible edibles in it were several strings of mushrooms suspended from the rafters to dry. For lack of anything better or more substantial they stewed these and made a meal of them. After awhile the owner of the hut, who was a powerful native chief and warrior, returned from a hunting expedition, and, having greeted the explorers in a friendly manner, set up a wild howl of despair. "What is the matter?" asked the explorers. "They are gone. My evil spirits have stolen them," wailed the chief. "What are goner" "Those, those!" shricked the chief, pointing to the cut cords on the rafters. "Why, no evil spirits took them," said the explorers. "We ate them." chief seized his stomach in both hands and rattled the bones inside his skin. "Ate what?" he gasped. "Those dried mushrooms." "Oh, suffering Moses!" roared the warrior, or words to that effect. "Why, you d-d fools, you we eaten the ears of all the enemies I killed in battle."-Col-

A Japanese Interior.

The interior of a Japanese house is quite unlike the interior of an American house. The rooms are low studded to suit the small stature of the occupants, so low, in fact, that it is often hard for a foreigner to move through them without awkwardness. Both the outer and inner envelope of the house are in a large part removable, and the screens of which they are composed can be easily adjusted to provide by h door and window space. Doors, therefore, in our sense, there are usually none, and such windows as may be built into the permanent walls are regarded more as a decoration than a necessity. A Japanese house contains no furniture, as we understand furniture, and except in certain special places it is bare of pictures and brue abrae And, lastly, the Japanese Louse is unheated except by charcoal beaziers.-

Neuralgia ATTACKS THE EYES Makes

THE LIGHT Unbearable. PERMANENTLY CURED BY USING

Ayer's Pills

"My husband was subject to severe attacks of neuralgia which caused ham of great pain and suffering. The pains of were principally about his eyes, and he of often had to remain in a darkened room, of often had to remain in a darkened room, of not being able to stand the light. Ayer's of Pills being recommended, he tried them, using one before each meal. They very of the property of the p soon afforded relief, followed by permasoon afforded relief, followed by permanent cure. I am a strong believer in the efficacy of Ayer's Pills, and would not be without them for ten times their ocost."—Mrs. M. E. Debat, Liberty, Tex. of thave used Ayer's Pills in my family of for forty years, and regard them as the overy best.—Uncle Martin Hancock, of Loke City, Electric City, Electric Pills

Telephone No. 60. THURSDAY, JULY 25, 1895.

The modesty of ex-County Treasurer Mandru is not monumental. After per- thus misrepresenting him. Mr. Cooney mitting a shortage to be created during his term of office, and putting the county to great expense in examining the re- the motorman whose car bore down upon valuable time and substance in trying to cords, he now sues for something less him, it was not in sorrow or in anger, convince the world that it can lift itself than one thousand dollars, alleged to be but in gratitude because "by the jurisdue him. And the worst of it is that prudence that he blew the whistle for ion that he is the pioneer in the movethis sum he blundered into paying over to the county by his own error, according to his own admission.

Joseph Medill, editor of the Chicago Tribune, is now at Bar Harbor, Me. Having been consulted in a matter of bnsiness by Elmer L. Volkmor, of Massillon, he responds in a letter in which he mentions his ill health and says: "In a few years more we shall all have taken a ride on Charon's boat on the dark river that runs out into the ocean of oblivion, whence no traveler ever returns. I am much obliged to you for copies of THE INDEPENDENT. I recognize many names in them which were once familiar, and whose owners were friends of mine. The present wearers of these cognomens are. I suppose, sons or grandsons of those whom once I knew. The Massillon paper which I best remember was called the Gazette. I wrote communications for it as far agone as 1840."

THE FAILURE OF SOCIALISM. It is uncommonly odd that the first note of discord in the co-operative colony at Ruskin, Tenn., should reach the ears of the public through that astute philosopher, Mr. Coxey, the cornerstone of whose faith is the ultimate public ownership of all the wealth of the country. It seems that Ruskin came into being as a direct result of the publication of Bellamy's book. "Looking Backward." Editor Wayland, of the Coming Nation, having advertised the idea and brought the enterprise to a head. Land was bought in Tennessee, and picked followers of the communistic doctrine were selected to prove to the world the feasibility of the Bellamy plan. Mr. Wayland moved to Ruskin himself, and his publication has been issued from that point. Thus all went well until the people of the colony, who had invested heavily, concluded that the chief apostle, Mr. Wayland, who had hitherto claimed the personal ownership of the Coming Nation, ought to turn it over to the association. He refused and continued to claim the ownership of a \$6,000 press, and to be the product of the colonists' combined labor. Then the members of the association became angry and called upon him to submit or leave the place. He decided to leave on condition that his interest in the whole enterprise be bought by the association Having lost its head, the e-dony may be expected to go to pieces very soon. Cutizen Coxey is rather mixed in his views on this subject just now. Personally he has little faith in the communistic idea. yet his public attitude has been favorable to all socialistic schemes, and if his foolish theories do not mean socialism

they mean nothing. HARMONIOUS REFORMERS.

The Populists of Stark county who The Populists of Stark county who expression to an unwelcome truth when have cheerfully volunteered to remove it is said that the library taste of Mass.lall the kinks from our public affairs, gave striking evidence of their capacity to regulate the world, by the manner in which they regulated themselves, at their convention on Saturday. It cropped out early in the proceedings 15 seen burning on an occasional literthat a wolf in sheep's clothing was in their midst, in the person of Dr. H. F. Barnes, a masquerading Populist, who for a tew dollars, labored hard and long to elect Banker Raff to congress, last fall. The chairman, Dr. Cock, injudicaously named Dr. Barnes upon a committee, whereupon an animated debate followed on the question of Dr. Barnes's eligibility. The matter could have been disposed of easily but for the inability of threaten to be lost in the chase for the the gentlemen present to define Popu. elusive dollar. Major Armstrong may lism Somebody asked the question and nobody seemed to know. Finally Dr. Barnes settled the matter by declaring suppose it is so. We are not particuhimself a Jeffersoman Democrat, a believer pr Populsm minus its Socialistic We feed them on buyetes, fast horses features. Thereupon the doctor was and base ball bats, and expect to deruled out, and the convention took a recess. At this stage of the game Dr. Barnes and Allen Cook came together in a pugilistic encounter.

by its footsteps, seems to be of the opinfor. This is what Nasby wrote:

CONFEDRIT X ROADS, (Wich is in the State uv Kentucky,) Feb. 23, 1575.

The silver bill don't amount to a soo markee for the Corners. In the first place Bascom hez alreddy put up the price uv likker to correspond with the depreshiashun uv silver, so there ain't nothin made in that direckshun.

When it comes to payin debts with greater eeze it doesn't help us a particle, for we never intend to pay em at all. We hev a shorter method uv deelin with bloated bondholders.

But ez we want to pay, we must be furnished with suthin to pay in. Silver am't goin to do it, for how kin we git the silver? Ef our notes wood git silver, and other people wood take that silver at any discount, then it wood anser, for ef ther is any one thing that a Cross Roader delites in, it is givin his note We wood even go so far as to sekoor em antil, as he hopes, a day of reckoning by endorsement. I wood endorse Deekin Pogram's paper and he wood endorse mine, and we wood all endorse for each the lenders and make em any more con tented.

Repudiashun is jist ez easy and vastly more comprehensive and all-embracin in its effex than any sich parshel releef ez debasin the currency. Ef they hev morgages and see fit to foreclose, let em. A lozen men with shot-guns kin easily hold the minyuns uv the law at bay, and by the time a dozen or more uv the graspin oppressors hev the tops uv there heads blowd off, they will begin to remember that the debtor class hev rites

But there ain't no yoose uv talkin uv this. The public lack confidence in us. I don't suppose I cood go to any uv the money centers uv the world and borrow chilled hearts, increasing in number as a hundred thousand dollars on my own name, with the endorsement uv the Deekin. I never cood find any one more confidin than to lend me \$8.32 at one vencher.

Wat we want is a money that we kin git hold uv-that everybody kin git all ne wants uv. Ef my sejestion uv makin leather dollars is rejected by a unwise generashun wich don't recognize their benefactors, why then let us hev suthin which is at once substanshel and kin be made plenty. My plan is this:

Give every corporashen the rite to is hoo jist ez much money ez it wants to based upon the faith uv the corporashen wich ishoos it. For instance, the cor porashen uv Confedrit X Roads ishoos its script to jist sich an amount ez it chooses, and distribits it pro rata among its citizens. That scrip shel be legle ten der for everything, and any one refoosin to take it shel be immegitly taken out and hung. Some sich legishen ez that

youd be necessary to inspire confidence. The effect wood be miraculous. Then we wood all hev money, and cood pay the bloatid bondholders without trouble We shood bev money with wich to stinulate enterprise and give the spirit uv haracter full scope to run and be glorifactries and distilleries, and go on in a service. way that wood astonish the offete governments uv the Old World. Then wood there come a period uv prosperity onto us that wood make up for the depreshin uv the last four years, and things wood

This is better than the Silver bill, or anything that I know uv. Moonissipal bankin is the remedy for our finanshel woes, and it is the only thing that will save us. Let the friends uv silver abandon their skeem and come to the support uv mme. Silver is only a parshel relief -my idea is complete. With sich money I cood pay off Bascom and hev enuff to live on to the last day uv my life.

law partner of John C. Welty, who recently mysteriously left his home and erable by marching through camp belabride of six months, presumably for a boring a bass drum. foreign shore, just as mysteriously came back Saturday night, but he did not come to stay nor to join his wife, now with her mother, Mrs. Weiler, of Hamilton, in Washington. He says he is simply here to arrange some business afhe was in the West looking up a location. When he settles on a place he will not ask his wife to join him, but hints that a divorce is probable. He indignantly denies a rumor that he left to dodge creditors and says the express understanding was that his property was to be used to liquidate his debts.

STARK COUNTY POPULISTS. The Populist county convention began

on Saturday with a row. Dr. H. F Barnes and Allen Cook came to blows because the former was regarded as a yellow dog Populist, and after rolling around on the floor for five minutes resumed standing on their feet. The ticket nominated is as follows: Representatives. Wm. Miller, Lawrence township, and James W. Roth, of Limaville; sheriff, P. W. Leahy, Canton; clerk of courts, Byron B. Bauman, Robertsville: treasurer; Wm. H. Hoover, New Berlin; commissioner, George W. Mathie, Massillon: auditor, Frank W. Immel, Marlbero: infirmary director, Wm J. Lackie, Canton; surveyor, Wm. H. Martin, Plain township.

The resolutions adopted by the convention, after endorsing the Omaha platform, continue:

1st. We declare for and recommend to the tax-interest burdened people of our state and nation the measure known as the Coxey Non Interest Bond bill introduced in the Fifty-third congress. H. R. 7463, June 15, 1894. This measure will furnish all of the money necessary to do the business of the country on a cash basis and direct to the people without interest or the intervention of the national banking system, by utilizing at all times the idle labor in making public improvements that can not be put upon the market to be sold to come into competition with the surplus products.

2d We declare for the free and unrestricted comage of silver at the ratio of 16 grains of silver to I grain of gold without reference to any other nation. 3d. We declare for the Initiative and Referendum, whereby the people are given a vote upon all laws before they become operative.

4th. We declare for the issue of a full legal tender money in payment of a service pension to all soldiers, as follows: progress wich belongs to the Amerikin Eight dollars per month to commence with, and one cent per day in addition ned. Then we cood bild railroads, and thereto for each and every day of actual

> 5th. We condemn the practice of the Demo-Republican parties in national, state, county and municipalities in issuing bonds bearing interest to pay running expenses of the government, and for making public improvements, taxing the people to pay for the use of the money and still owe the principal as exemplified in our own county in the construction of our court house, by issuing two hundred thousand dollars of bonds running for twenty years, bearing 5 per cent, interest, which will take out of the taxpayers two hundred thousand dollars in interest, and they will still owe the two hundred thousand doilars of principal.

THAT LOCOMOTIVE COLLISION.

The locomotive collision aunounced for Saturday afternoon did not take place. A. L. Streeter, the manager of the enterprise, had not paid for his old engines when the hour arrived for the men early Wednesday morning un- event, and the C., C. & S. railway peodoubtedly saved the Hansen block, lo-ple declined to permit their property to eated at the corner of Mill and North be demolished. There were plenty of streets. Mrs. Elizabeth Hoffacker, who occupies apartments in the block, rose construction was near against insight the same of the fenced enclosure, and preearly to wage war against insects that pared to view it from locations just as are usually nameless, and gave their good and free of cost. Streeter claimfavorite hiding places a liberal coat of to have lost a large amount of money, gasoline In order to distinctly discern supposed to be about \$700. At 6 o'clock each morning all hands retire to the bath house and sport in the water for at least thirty minutes. Sunday morning William Ertle, the pet favorite maid and the inmate was found lying of the camp, served his Mr. Ertle noodles. dish. great demand among the young ladies fairs and will soon leave again. He says and is looked upon with envy by every man in camp. More than one pair of admiring eyes are turned in his direction as he struts, with stately bearing, about the grounds. The musicians are attired in white duck trousers and caps, and wear blue coats. In honor of his Mas sillon friends who called, Mr. Ertle wore a clean shirt and a new tie, thus breaking the camp rules. The band did itself proud Sunday, strengthened by Joseph Ess, John Walters, Albert Wolf of Dayton. He arrived at the Hotel and Charles Barkheimer, who came up Conrad on Saturday afternoon. On Sunfor the day. An excellent concert was given at 2 o'clock.

Fully 2,000 Cleveland folks spent Sunday at the lake, and the band conert was the feature of the afternoon.

Mr. Ertle entertained in a manner exceedingly graceful and in language original with Wm. Ertle spouted frequently. At one occasion when several oung Clevelanders became obnoxious, Mr. Ertle addressed them as follows: "I wish you to distinctly understand that we cannot be ostracised here, we entirely if you will sobreniate you Strange to say presist in lottering." the fellows left and put in an appearance no more during the day.

All in all the boys are thoroughly enjoying themselves, and dread the approach of the tenth day, when they pull up stakes and return home. Their good natured manner has won for them many warm friends at the lake, and their departure will be deeply regretted. Sunday the boys were visited by

Frank Vogt, Joseph Klotz. W. R. Coleman, Fred Shearer, Dr. Jones, Edward Pille, George Hackett and Lewis Holcomb, of Massillon. They expect many of their friends during the week. The Bowery of New York city could

scarcely furnish a tougher set than the gang of young men who accompanied the Cleveland lau, dry girls to Chippewa Lake on Sunday Two excursion trains arrived about 10 o'clock one carrying 1,400, and the second 800 people. The young people fairly took the place by storm. Something like 90 kegs of beer arrived in advance of the excursionists, bed, but he insisted that he was all remained mostly at the lower grounds.

There vere a few among the crowd who became ashamed of the actions of the intoxicated ones and they proceeded to the upper grounds where the campers are mostly located and where quiet prevails Fights were at every hand. Friends would drink together until inof resisting the temptation capable started

to fight and quarrels among themselves would end in bloody It was in several instances a case of hit the first head within reach be t that of friend or foe. Just before the Massillon train pulled into the station a fight started among Clevelanders, at the station. Four or five attacked one young man and he knocked them right and left Fully twenty joined in the attacking party at that and the young man brave ly stood his ground. He was soon stretched upon the floor, however, and the brutal mob began to kick him. Several Massillonians interfered and succeeded in getting the fellow away, or he certainly would have been kicked to death. One fellow almost twice the size of the downed man, kicked the latter in the head, inflicting a scalp wound four inches in length. When rescued. the young man was bleeding from various wounds. Dr. F. G. Jones and Frank A. Vogt, of this city, were the first to attempt the rescue. They were then delphia, and in answer to a query sent joined by several of the young man's friends.

Present Crop Conditions,

The official crop report for the week ending July 22, for northern Ohio says that good rains fell in the early part of in the morning. section they were quite heavy. The days have been quite warm, unusually so during last three days of the period. The condition of all vegetation has improved tucket, Mass. Wire Win. Barnard, care and in the eastern half the change for Harriet May, Nantucket, for informathe better has been quite decided. The threshing of wheat has begun, the yield being generally light, and in several counties of poor quality. Oats are ripening, in some places the harvest has be counties. Corn is doing very well, but in some places is quite uneven. Potatoes show some improvement, but the ground is too dry for a good development of the haps, been the cause of the plaintiff tuber. Pastures are still badly dried up, losing a second chance. She therefore claims to have been greatly damaged by his breach of property damaged by s scarce in many places, and in some localities stock feeding is still necessary. Gardens are looking better than one week ago. Large fruits continue to drop, especially apples, and small fruits have dried badly on the bushes.

Don't pay high prices for baking powder when you can now get J. Monroe than ever before on account of the reduced cost of materials and manufacturing. The quality is known to be the

return to Massillon some day and do all

The week ending Saturday, was one without a parallel in the history of the Massillon postoffice. The mail matter sent out reached a total of 2,000 pounds. There were 276 tie sacks of newspaper mail and 123 letter pouches. Mailing Clerk Shepley says that it has become necessary to order a new sack rack with accomoudations for 50 additional sacks. Notwithstanding this great growth of business, the office's record for efficiency is unimpaired.

WILL GO TO CLEVELAND. W. & L E. Offices Likely to Be Removed

CLEVELAND, July 24.—It is stated on the best authority that the general offiwill be removed to Cleveland before next

The Wheeling & Lake Erie company's present offices are located on the old canal bed in the northern part of Toledo. The company has had continuous trouble in securing privileges from the Toledo city council, it is said, to enable them to do their work to the best advantage and tributing to the City Treasury They Feel on the adjustment of many matters which have arisen. It is claimed that The entire Patagonia populace turned the Toledo city fathers have taken an antagonistic stand towards the company which has embarrassed it materially.

This is, however, not the primary reason for the removal. The fact that Cleveland is the center of the bituminous coal shipments is the real reason for the change which is soon to take place in the location of the general offices of the of the citizens of that vicinity had in railroad. Cleveland is recognized now, dulged quite freely in lager beer and and will become more and more so, as the bituminous coal center, especially in the handling of coal for the Northwest-

ern region.
The Wheeling & Lake Eric railway officials, it is said, have long realized that if they hoped to compete with the Pennsylvania company, the Cleveland, Canton & Southern, and the Cleveland, Lorain & Wheeling railways, which al ready have terminal facilities in this city, they must al o have a line to Cleve-The recent decision in New York, which allows the Wheeling & Lake Erie company the joint use of the Valley railway's tracks into Cleveland, together with the Baltimore & Ohio railroad, gives the former company an entrance into the city, and as soon as the settlement is complete the offices of the company will be removed to this city. By coming to Cleveland the company secures tonnage to exactly the extent it needs, for the big boats bring down ore and return with coal, and the Wheeling & Lake Erie could secure its share of the business over the railroads which this

Masked Train Robbers Operate Near Wauseon.

THE EXPRESS CAR ATTACKED.

Through Express Car Safe Resists All Attempts to Force It-Dynamite Used

By Associated Press to The Independent.] Tolebo, July 24.—The Lake Shore train going west was held up at 2 o'clock this morning at Wauseon, O. The officials say that the robbery was committed by employes of the company, as they had positive information that trains would meet on a siding, and also of an had a day coach, baggage, express car, and three sleepers. Usually but little passed through our village last Friday | money is carried on this train, but a heavy shipment was made last night. The passengers were not molested. Offi-

cers are searching for the robbers in ev-

ery direction. CHICAGO, July 24.—The train held up at Reese switch, near Wauseon, arrived here on time. The robbers got only \$150 from the local safe. They could not open the big through safe, even with dynamite. The windows of the cars were broken. The big safe was terribly shattered but unopened. The crew and passengers were seared but none hurt, although masked robbers fired often, stoned the car, etc. Ever since the holdup near the Indiana line a year ago the company has carried dynamite proof

When the train was stopped volleys were poured into the express car. Three masked men covered the engine, others broke into the express car. Still others remained outside firing and threatening to blow up the train. The express messenger did not have the combination of the big through safe, but was tormented until he opened the smaller or way sate. Charge after charge of dynamite was sent into the big safe. The robbers riddled the car and knocked the safe over, but could not open it. They backed out the express car, after their failure, gave signal to the outer sentinels to join them, all backing through the weeds into the woods, firing as they went. They are believed to be old railway employes, but were all masked.

FIVE MEN ARRESTED.

The Kid of Apache Telu.

By FLORENCE FINCH-KELLY.

[Copyright, 1895, by the Author.] Baby, my babe, What waits you youder Dear little feet. Where must they wender Out in the world? Soft little hands What shall they do there

Baby, my babe,

Out in the world? All around Apache Tejn for miles and miles hes the gray, cactus dotted heat devoured plain. deird and fasci nating, with its placid, tree Tringed lakes that are not; its barren, jagged turquoise tinted mountain peaks, born here and there of the horizon and the desert; its whirling, dancing columns of sand that mount to midsky, its lying distances and deceiving levels, its silence and its fierce, white, unclouded

And when you draw rein under the cottonwoods at Apache Teju, uneurl the wrinkles of your eyelids in the welcome shade and cool your eves in the vivid green of the alfalfa field it suddenly comes to you that never before did you understand what blessedness there is in a bit of shadow and a patch of green things growing.

From the spring at the top of the long slope behind the house a line of noble old cottonwoods files along the acequia halfway down the hill, and there, where the ditch divides, forks in to a spreading double row, which incloses the house and stables and comes the road, where the two ditches empty into a pond. The house lies there in this circlet of trees, a low, whitewashed. flat roofed adobe, rambling along in apnarent aimlessness from cozy rooms through sheds and stables, until the whole connecting structure incloses a large corral

In front of the house is a tiny square of blue grass, bordered by beds of geraniums and larkspurs and hollyhoeks, inclosed by a low adobe wall and shaded by a young cottonwood growing in the center. Beyond, on the slope of the hill below the ditch, where its waters can be spread over all the surface, is the rich, velvety emerald of the alfalfa field And the fame of that little square of grass and of that little field of alfalfa City and from Separ to the Mimbres. And that is Apache Teju, one of

many southwestern contrivances for the practicing upon animals of cruelty on a tremendous scale, otherwise called cattle ranches. Or rather this is headquarters for the northern half of a ranch that spreads over 7,000 square miles of the arid hills and plains of southern bones and sundried hides of cattledead of starvation and thirst.

The superintendent's wife and I sat in the tiny grass plot enjoying the balmy breath which in the late afternoon steals over and cools this strange. hot land. Texas Bill had just galloped home from the nearest railroad station with a big package of eastern mail, and stood before us, asking:

"Is this the double A, quart circ., bar

'The what?' I gasped, looking at the queer little figure in astonishment. He was perhaps a dozen years old, though persenced looking face behed each oth-, bit afraid of a pitchin horse. I'm a er and made guessing difficult. He wore whole, big, blazin lot afraid!" a man's sombrero, old and dirty, which . came down to his ears and lopped a wide, unstiffened brim around his face. With tardy recollection of his manners, learned who knows where, he doffed his headgear after he had spoken, and stood there with serious face, but unable to repress a smile that twinkled in his great | hands. blue child's eyes at my astonishment. A big rent across one shoulder of his shirt showed a strip of sunburned flesh beneath and sent one sleeve dangling over his hand. His baggy trousers-no. that is not the word, they were "pants" -were held in place by a halter strap buckled tightly about his waist, and his feet were concealed in shoes so much too large for him that his toes were not vis- ! ible in the mouths gaping at their front ends. And on one foot clanked and jungled the pride and glory of his attire -a huge spur, three inches long, silver plated and brightly polished, and so; heavy that that foot dragged as he walk-

He repeated his question, and the superintendent's wife leaned forward, with a laughing aside to me.

You tenderfoot! Haven't you learn ed our brand yet?" And to the boy: "Yes, this is Apache Teju. Do you want to see any one?"

"Boss home yet from Deming?" "Mr Williams" I expect him this

The boy threw himself down full

length upon the grass and pressed his face against the cool, green blades

"Well," he exclamed, "at's prefty fine here, ain tate. That given down there is just out of sight. I he and there, neck, but he can go it now as fast as he was blue grass and alfalfa here, but, wants to who'd bave thought it would look so DECE?"

"Do you want to see Mr. Williams?" "I guess it am't necessary," and he sat up again, pressing a harriful of grass upon each glowing check

I handed him the candy box, and he helped himself daintily with the tongs. saying, "Thank you, ma'am," with a sidelong glance which let me know that his heart was won to my service from that moment. He put a piece in his mouth, and his face beamed with pleas

the boss last night in Deming," he added, turning to Mrs. Williams. "You're his wife, ain't you? I thought so, soon as I saw you. He was kidding me about coming out here to be a cowboy, and I told him all right, if he wasn't running a blaze, I'd go him on that. I was to have rode out with him in his buggy. but I was up pretty late last night with the boys, doing the town, and when I. got up this morning he was gone. I wasn't going to have him think I'd backed out of the bargain, so I says to

The naive bravado of the child's speech was irresistible. It won my heart as completely as I had won his. and I straightway emptied my eardy be x into his hands, "Oh!" he breathed. looking at the heap of dainties with infantile delight. And then he fell upon them with avidity and did not speas another word until the last one had disappeared down his throat.

So that was how the Kid came to live at Apache Teyu. He said his name was Guy Silvestre Raymond. But whether a mother's lips had really bestowed that name upon him, or he had appropriated it to himself out of some blood and thunder romance, whose hero he had decided to imitate, name and all, is one of the things that nobody but the Kid will ever know. But it didn't matter much anyway, for he had always been called together again in a little grove beyond, Kid, and that name followed him to the ranch, much to his disgust. For he had decided, so he told me one day, that the ladies of the household would call him Guy, and that among the men his name should be "Broncho Bob." He was a waif of the railroad. All

his life had been spent along its line, blacking boots, selling nuts, candy, papers, on the trains or around the depots of the frontier cities and towns. And he had taken care of himself ever since he could remember. He had reached Deming a few days before in a worse but less picturesque state of dilapidation than that in which he presented himself at Apache Teju. After deciding that he would leave the railroad and become a cowboy he had scraped together, in . heaven knows what devious ways and fills all the land from Doming to Silver | by what lucky chances, the apparel of state in which he set forth on his new,

in the corral. Kid had been directed to mount an old and gentle pony whose meek and humble appearance did not at all agree with his ideas of the sort of steed Broncho Bob should bestride. There was in the corral a black horse called New Mexico, where for hours and hours i Dynamite, a mettlesome young thing you may travel toward a horizon swim- | whose one specialty was bucking. "I know he won't because—don't you tell mamma-I was on him myself one day, and he never bucked a bit!"

was nobody in the corral, and I climbed on his back, and he was just lovely!" And just then, with Kid astride him, Dynamite pranced and curveted down the road. With a beaming face Kid waved his hat at us and galloped off. Dynamite making not even the sign of a desire to buck. After that the boy could And as long as Kid bestrode him, et Madge, with Kid's connivance and help. surreptitionsly mounted him, Dyna worked wee upon any grown man who made the attempt.

one under Kid's mastership. The bey never rode at a less pace than a gallop. and even in that dry, hot air Dynamite Madge's eyes. was always recking with sweat when they came home.

Just how the Kid put in his time out on the plains was a mystery. The cow boys with whom and for whose assistance he was sent out good naturedly in hell." If they needed him, he was nowhere in sight, and if they particularly did not want him he was sure to come charging over the plain, straight upon the cattle they had bunched, and scatter the frightened creatures to the four winds. But mostly, they said, he managed to get lost, which was only their good natured way of putting the fact that he slipped away from them and their need of him.

water. Out on the plain we saw the Kid digging a hole in the hard adobe soil. yelling like a wild man, with Dynamite at his highest speed, chasing a jack rab-

bit. That evening I heard him giving hole. Madge a thrilling account of how he had chased a gray wolf, which, after running chief is buried?" many miles, had turned on him and viciously leaped at his throat, and how he the place? Do you know right where it had made Dynamite jump on the beast is?' and trample its life out. And I recigfor Madge's ears of his chase of the barely see, ontline his grave. Are you jack rabbit.

For by that time he had become, in her eyes, the exemplar of all that is inspiringly bold and daring, and he felt it xessary to keep up his reputation For her he was a knight of prowess who could do anything he wished and against when nothing could prevail. So he told her wonderful tales of what he had seen and done and been through and of his daily adventures and brought to her the occasional results of his single handed combats with birds and beasts. He offered to dig up a tarantula's nest for her and to eatch and tame for her pleasure a sidewinder rattlesnake, or, if she preferred, a golden oria rattlesnake or an oriole; whatever she wanted him to do he was ready to attempt. And Madge looked and listened and worshiped, and Kid, basking in the warmth of her adoration, swaggered about in ever increasing pride and un-

One day, just after he had returned from a two days' trip out on the range. I heard him telling her a bloodcurdling tale of an adventure with a mysterionand villamous looking Mexican, who. he said, had shot off the end of one of his fingers Then, the Kid declared, he had made Dynamite rear and strike the Mexican to the ground with his forefeet and then trample him until he was so dead that he'd never shoot anybody's else fingers off. Madge was filled with horron and admiration and pity and begged to be allowed to see and bind up the mutilated finger. But he refused with superior indifference, clinched his bleed ing finger in his fist and said it wasn't ' anything and didn't hurt anyway Madge's mother called her away, and straightway there appeared at my door a boy with pale face, quivering lips and tear filled eyes, holding up a bloody hand. I bound up the wound, which was a clean cut chipping off the end of They were mounted on Dynamite, Madge one finger, and he buried his face in my that that was what the child needed. I

"How did you hurt yourself, Kid?" "I was making a peg to hang my sad dle on, and I chopped my finger with the

I said nothing, but soothed and cuddled him the more, and he sobbed at my Good enough for him! I wish it had knee in sheer enjoyment of the luxury been Holy John!" of being babted. After that I think the every possible opportunity in order that growled: he might come to my room to be taken care of and petted and comforted. He left all his swagger and bluster and of his life!" brayado outside, and I babied him to his heart's content, feeling sure that it was carry a bundle done up in a gunny sack this child's right had come to him. But he did not allow these private seasons of relaxation, which he trusted me not to betray, to interfere with his double; character of knight of prowess with Madge and of Broncho Bob with the men

Excitement did not lack at the ranch whenever the Kid was at home. If he was sent to help with the milking, one of the cows was sure to kick over a full milk pail, knock him over with her hoof, or break loose from her restraining ropes, charge around the corral like a wild beast, and crash through one of the house windows or plunge in at an open door. If he was told to house the geese and chickens for the night, such a commotion ensued as brought the whelhousehold to see if coyotes had broken in to the chicken yard. At sight of him the pet angora goats fled on their swift est legs, with a running leap mounted

One evening the boys were sitting around the kitchen door talking quietly, her bury a dead kitten. Holy John satin a slouching attitude on the doorstep, his new sombrero, with a stiff, curled brim, tipped far back on his head. Kid came in through the corral and stood in the kitchen for a few minutes. Then he seized the molasses jug and tiptoeing very softly behind Holy John filled the brim of his brand new sombrero with the sticky liquid. It flowed out over his back and down into his trousers, and mite's behavior was perfect. But he Holy John lifted a wondering and bewildered face to see his companions breaking into uproarious mirth. Then The black horse's life was not an easy his long enduring patience was smothered in wrath, and he laid violent hands upon Kid and spanked him before

> That was too much for knight of prowess tamely to endure, and the boy blustered around in his most vigorous impersonation of the character of Bron-

"No," he replied carelessly. "it wouldn't grow there. The soil's too hard."

night under the cottonwoods beside the lower acequia and that night we heard them in earnest discussion long after they had gone to bed. Mr. Williams was with them for a short time and came back saying that they were talking about

Williams went on, "of waking up one night and seeing the Indian's skeleton rise up out of the ground and pounce on

him!" And I started for the corral what they had learned was the only outright. He will have Holy John so terrified that the poor fellow will want his time at once. For John believes evanimals he was playing jokes on the erything that is impossible, and he will ace ghosts all night long and be afraid of his own shadow in the daytime." That night, just as morning broke,

the whole household was awakened by a lond, piercing yell, followed by another and another, and all rushed from their beds in time to see Holy John leap over for Kid was off with Madge, helping | the fence and dart down the road, still shricking as if fiends were after him. And beside his deserted bed under the cottonwoods lay some grisly thing, shining in the gray light with streaks and patches of white. Kid looked after the flying figure and said, in a tone of extremest satisfaction:

"He's sure buffaloed!" Holy John had awakened in the dim.

early dawn and found the skeleton of the Apache chief cuddling against him. That morning, as I sat in the yard reading, the voices of Kid and Madge came to me from around the corner of the house, and I heard a snatch of their i conversation.

"Madge, I'm going to pull my freight. I won't work on the same ranch with such a coward as that Holy John." "Truly, Guy, are you going away?"

"Yes, I am. I ain't going to stop to ask for my time. I'm going today, before the boss comes home. "Well, then, what am I going to do?

You're not going off to leave me?" Silence for the space of ten seconds. "Jiminy! Tell you what, Madge, you

"I can't! Mamma wouldn't let me! "Don't ask her! Come right along

with me! We'll elope, Madge! That's more fun than anything! Girls that is built for the upper lake route, costing anybody always elopes!' Then they wandered off to the alfalfa Madge had driven to Silver City, the field, and soon I saw them throwing

stones at the prairie dogs with which it was infested. So I concluded that what I had heard was merely some of the Kid's braggadocio, and, smiling at the long Mrs. Williams and I one day dis- I went out to see what it was. Kid was sentimental turn he had taken, I went on with my book and thought no more about it. But when lunch time came neither

Madge nor Kid appeared for the meal. Much calling failed to bring a response. Then I remembered and gave account et the conversation I had heard. It was found that Dynamite was gone from the corral. Evidently the little scapegrace had meant what he said and had carried Madge off. Mrs. Williams ordered the rized in the tale merely Kid's version are digging. Those rocks, that you can cart and at once we started after the fu-

"He has most probably gone toward "Me? What would I want to dig him Deming," she said. "I will send Red digging a hole-for Madge. She wants to are there, but I think we had better plant a tree. What did they bury him drive toward Deming as fast as possi-

About ten miles out we caught sight of the runaways. They were mounted on Dynamite, Madge holding fast behind. Kid was urging the horse furiously back and forth among a flock of carrion crows, and practicing with his lasso upon them any difference to him whether she chose to see if he was still there and hit the in their play that they did not see us until we were almost beside them. At first Kid made as if he would start Dynamite off on the gallop, but Mrs. Williams called him sternly, and he turned and trotted back to us, smiling and looking amazingly innocent.

Madge sat still and stared at us with big, frightened eyes, until Mrs. Williams had twice spoken to her, and then she slipped quickly down, to be folded in her mother's arms and sob upon her bosom all the way home. I persuaded the Kid to sit between us in the cart and drive us back, tying Dynamite behind.

"He was awful mad at first," the boy confidingly said, "to have to carry double. But I made him sure hump himself right along."

At home we found the superintendent just returned. He gave the Kid a paternal lecture, which probably did him as much good as if it had been in Chinese, and then in cattle ranch parlance gave him his time-paid him to date and discharged him.

And a few minutes later we saw the last of the Kid, as the forlorn little figure, with the wide, flopping sombrero, and the big, dragging spur, walked out of the gate and down the road toward Whitewater, and was soon swallowed in . the shimmering heat of the plain.

THE EXPERIENCES OF A TRAMP.

Since 1893 He Has Been "On the Road," and Now Begins to Regard Life as a Dismal Failure-His Reasons "for the

A few days ago a yellow haired personage dropped into THE INDEPENDENT office, and, after the fashion of his kind. asked permission to rummage in the waste basket. This was not at all surget them. This particular tramp, howand as he solicited exchanges of a large size, such as might be used as sheets for the bottom of a box car, a conversation ensued. It ended by the offer of the gentleman, who introduced himself as Roy Victor St. John, to reduce his experiences to writing. The rest is his:

the road, & I fail to find either a pleas- ing a land office business of late, and ant or profitable trip & while looking over my diary I find that my time has been mostly taken up in finding good hearted people to supply natures wants. evade Marshal Buck. I find that I left Marion on the 29th day of May and stopped off at Ashland, O., where there was work going on at diging trenches for laying water pipe, & as they did not start untill the next Monday morning, took the Ringling Brothers' train & went with them to Greenville, Pensylvania, & from there back to Kent, O. & Akron, where I looked for work but there was none in sight so I returned to Ashland & went to work the morning of the 3 of May. It was so hot that the men could not stand it & after exerting myself for 5 hrs. I got out of the ditch as the contractor drove us so we ould not stand it. There were 62 men when we started & at 6 o clock p m there were only 8 men left. I quit Ashland on the 4th, & went to Marion, but got no satisfaction & went to Bellefontaine, Springfield, Dayton, Delaware, where a man told me to go out in the country as there was lots of work to be had, & being dum enough to know no better I went out & my reception was very warm as the farmers set their dogs on me & one even went so far as to call a constable, who lived acrossed the pike to have me arrested as a suspicious character. I have olmost lost all faith in human nature & may if things keep on getting worse abandon all thought of trying to get work I Finally returned to Dellaware on the 11th & went to Shelby & tryed the tube works & to Mansfield where I was arrested as a va-To think of an honest man in jail, as

a tramp! I was given 15 days on the stone pile to think over my life's records kind & asked what my business was. any where. It was so vague that I start ed to go there & found my self in Sandusky.

There I found an old friend & also found that a man is a fool that has friends when he is in good luck he can do all in his power for a friend but when in hard luck his supposed friends are not there & so I got an even colder reception than I would from a stranger.

On the 25th I again set foot on the streets of Tiffin went to work for the North Western Gass Co. at \$1.00 per day & board & lived on bread & bologna for 2 days & 7 hrs then quit & went to town to cellebrate the 4th of July the glorious national birthday, & did so with 9 other fellows flint glass blowers, on 4 kegs of Lager Beer &. We enjoyed it to the fullest as none of us could be called sober. Went to Shelby on the 6th & tryed for work on 8th when the tube works opened up no work so to Canton again, to Massilon, to Canall Dover, to New Philladelphia & back to Massilon only to find no work & a fine rain on the 25th; bi taking an other mans advice to go to the new asylum for a job I was nearly drowned and find myself on getting up from my nice soft bed on the hard floor of a box car, with old newspapers for sheets. Very stiff and life not as rosy and sunshiny as it was in childhood with a mother to look after and advise me.

called tranps, and if they did there would not be so many or so troublesome. As for my part, I do not know where this life will end, as since November 1893, All people do not take the same light of this life as I do, but at the paltry wages payed for the hardest work that a man can do it not only makes a man seem lazy, but it discourages him & makes him think that life is indeed a failure. ROY VICTOR ST. JOHN.

Governor McKinley Points

AIN'T GOIN' TO BE NO CORE."

Ohio's Executive Contributes His View on the Subject of Vacations-He Hasn't Had One for a Long Time-Looking Forward to One Some Day.

Governor McKinley has been asked to furnish his views on the subject of vacations. This is what he will have to say that their meat is of a first-class quality on the subject in Demorest's magazine: and that they are making a good living

"You remember how the small boy disposing of it who asked another small boy for the core of an apple the latter was eating received the reply, 'There ain't goin' to be no core?' Well, that will give you an idea of where I stand in regard to vacations. With me 'there ain't goin' to be no vacation,' and, furthermore, there hasn't been any for a long time. Others take their summer outings and, of fore Mayor Schott, all testified that course, enjoy themselves; I stick to my they were looking for work. The mayor desk through the hot days and work. Perhaps it would be better were it not so; perhaps it would be better for me if out at the usual workhouse rate. Three took an occasional vacation; but there of them were held pending an investigais a mountain of work always looming tion of the stories told by them. The up before me, and I think that, after all, latter appeared to be more respectable I am best satisfied when I am pitching than the others, and if their stories into it, tunneling it, burrowing it, demolishing it as best I can. When I was a boy I learned a little poem that began:

Whene'er a duty waits on thee, In thy calm judgment view it. Do not idly wish it done; Begin at once and do it."

"I have always remembered those first mes; and the duties are always waiting. That is the main reason why I take no vacations. Possibly I owe it to myself to rest more than I do, but I am a beexacting master, it has been a generous wooed too ardently vacations and other

leasures.

"Of course I take a summer day out ng occasionally. I like to fish, not that I catch much, -my state is not a fisherman's paradise; but it is pleasant to sit on the bank in the shade with the water flowing quietly past, and dream or phithe means for the gratification of every reasonable pleasure or love of the beauti ful in either art or nature. I will view our own marvels before giving my at tention to those of foreign countries."

PETTY THIEVING.

Cheap Rascality That Needs Running Down.

Some amateur sneak thieves are at work in several parts of town, who steal Friday. He was 70 years of age. door belis, porch chairs, hose nozzles. and similar articles, whenever they get a chance. It is believed that many cases are unreported. The following instances have been made known to THE INDE-PENDENT: A chair from Mr. Iuman's, a chair from J. K. Russell's, A. Crone's door bell, F. W. Adams's door bell, Adam Roof's hose nozzle and connections, Z. T. Baltzly's hose nozzle and

The posts and the foundation were in a

On the night of May 10, while in dis charge of his duty, the plaintiff, Mr. Mc-Donald, was on a locomotive, and under its weight the bridge gave way. The engine and its occupants were hurled into the stream below. Mr. McDonald was so injured that his right leg was amputated. He was fast in the wreckage for five and one-half hours and during that period suffered intense agony. His spine was injured, eight teeth were knowled out and his entire nervous system was wrecked James Kennedy, of Youngstown, is plaintiff's attorney.

A STORY ABOUT CLEVELAND.

C. M. Miller, of Canton, and What He Ha-Reard.

J. S. Coxey claims to have direct inenstein, has not allowed his head to be- formation of a sensational character, come swelled by his success. He says proving that the election of President that he will not adopt thief catching as Cleveland, in 1892, was the result of a a profession, but will continue to hang bargain between himself and an associapaper as neatly and artistically as ever. tion of New York bankers, whereby the latter furnished the National Democratic committee with \$1,000,000 in return for losophize if you want to. But some day I intend to take a long vacation, and it will not be passed in Europe, either. My opinion is that our own land contains of this place, died Friday from the effects of an accident which occurred in the early part of the week. Mr. Hoise Committee with \$1,000,000 in return for an anti-silver policy which Mr. Cleveland has consistently followed. Mr. Coxey claims Congressman Sibley, of Pennsylvania, as his authority. Mr. tween this place and Doylestown, when Sibley furnished the facts to Mr. C. M.

Mr. Sibley, it seems, is peculiarly intimate with the members of the conference that brought about this deal, and assumed to speak with knowledge born tification set in, causing his death on of conviction. He said to Mr. Miller that a poll of the votes completed three weeks before the Presidential election in 1592 by the Bankers' Association of New York city, regardless of party, brought out the fact that the re-election of Harrison was assured, and that the new house of representatives would be strongly Democratic. This phase of affairs did not suit the bankers, who sent a delegation to Mr. Cleveland, told him what they had ascertained, and said to him that if he would agree to certain propositions and to carry out certain legislation, they would put a million dollars into the campaign and bring about his election. The proposed policy, which was agreed to by Mr. Cleveland, embraced three propositions; the repeal of the silver purchasing clause of the Sherman law; the vetoing of and opposition to any silver legislation that would look to free coinage or a larger use of silver; and the issue of gold bonds. Mr. Cleveland consented that the money should be raised on the conditions made, and his subsequent official actions are regarded by Mr. Sibley as proof that he has delivered the goods. Mr. Sibley added that owing to the failure of the friends of silver and paper to unite their forces for 1896, disaster would overtake the republic and he did not believe the country could survive the shock.

a hitherto respected citizen of this place. corporations, together with the amount in the capacity of a teamster by William (G. Axxe, proprietor of the flouring mill at this place. For several months Mr. Axxe has been missing sums of money. but has been unable to apprehend the guilty party. Some time ago he engaged a young man named J. F. Hay, of Canal Fulton-saloons, 6: city's share, Beach City, to work on the case. Hay worked dilligently and soon became suspicious of Howenstein. On Tuesday he secreted himself in the office and awaited developments. Soon afterwards Howenstein entered and began tampering with the lock of the money drawer. Hay advised his employer of what he had seen, and together they confronted Howenstein. He broke down and confessed to having stolen sums of money at various times and which amounted in all to about \$800. He settled the matter by paying \$300 in cash and giving a mortgage on his property for \$500. He is a widower, but has four grown children, who feel the disgrace keenly. Howenstein was not a drinking man, and what he used the money for is a mystery. THAT RAILROAD DEAL

History Leading to the W. & L. E.-Valley Compact.

CLEVELAND, July 19.—By the terms of the agreement just reached, the Bal-

timore & Ohio company retains full control of the Valley railway. The Valley will take the place in the Baltimore & Harry D. McDonald is the plaintiff in Ohio system designed for it when the case, commenced in court today against purchase was made six years ago. But obtain by a contract, the details of which the committee are now arranging in way tracks into Cleveland and the use of the Valley terminals in this city. The details of the agreement between

the Baitimore & Ohio company and the first bondholders of the Valley railway have not been published, but it is understood that there has been a compromise. The history of the litigation is inter-

esting. The Baltimore & Ohio company finding four years ago that the Valley road was not earning charges, wished to reorganize and thus reduce its fixed charges. There was an issue of \$1,600, 000 i per cent first mortgage bonds, \$1, 524,000 6 per cent second bonds, and a floating and miscellaneous indebtedness exceeding \$2,000,000 The Valley Company defanited on its interest, and the road, at the instance of the Baltimore & Ohio company, was thrown into the hands of a receiver. Foreclosure proceedings were instituted. Then was presented a spectacle somewhat unique in railroad foreclosures, but in this in stance perfectly natural and legitimate. The first mortgage bondholders resisted the foreclosure proceedings. Their 7 per cent bonds and not mature until 1906, and were worth considerably more than oar. 120 being a common quotation These bondholders did not care to be paid off at par, and actively resisted the foreclosure suit. The litigation still hangs fire in the United States court in

Until recently the Baltimore & Ohio Company declined steadily to allow more than par for the first bonds. The bondholders have persistently demanded 120. But all the while the property was lying comparatively idle. more & Ohio had invested \$500,000 in terminals here, and this capital was lying idle. The bondholders, on the other hand, were under considerable legal expense, and before them were the uncertainties and the delays of law. Prosperous times returning, the Baltimore & Ohio company was more auxious than ever to rehabilitate its property and make it do its best in an earning capacity. It modified its plans, and made a more generous offer to the bondholders. The bondholders, in turn, made a new proposition to the Baltimore & Ohio people, and it is this that has just been accepted at a conference held at New York between the two reorganization committees.

The first bondholders had enlisted in their cause the Wheeling & Lake Erie road, and it gains an entrance into Cleveland by the traffic contract which is now being formulated in New York. The fixed charges of the Valley rail interest at 4 per cent. of \$6,000,000

way by the reorganization will be the bonds, payable in gold, or \$240,000 This is a larger amount than the Valley road has yet earned above its expenses. But with the coal traffic which the road will receive from the Wheeling & Lake Erie company, with the increased traffic which will be created by a rejuvenated Baltimore & Ohio policy, the creation of great terminal facilities, etc., there is little doubt that the little road can meet the annual obligation fairly and squarely. The Sippo "Free Church."

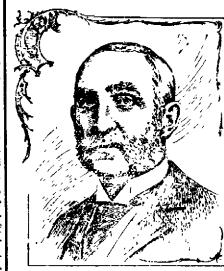

The "Free church," of Sippo, to which

any God-fearing man or woman can go and worship, continues to hold its meetings in Mr. Remoehl's barn, and the congregation extends a cordial invitation to all people, regardless of sect or creed, to atsend and spend a day of holiness with them on Sunday. The Church in Christ, from which the "Free church" does not flourish like the new church. The members of the latter expect soon to forsake Mr. Reinoehl's pretentious barn for an edifice built to their taste, and to which the good and bad alike may go and hear the word of God ex-Repairing promply and neatly done.

Signs of Midsummer Dullness

A Perceptible Decrease In the Demand For Most Manufactured Products - Numerous Advances In Wages and Striket More Plentiful - Business Failures.

NEW YORK, July 20.-R. G. Dun & Co.'s Weekly Review of Trade, issued today says: The week's news is not entirely encouraging, but is all the more natural because there are signs of midsummer duliness. Wheat prospects are not quite so good as last week but still there are lower prices, as corn and cotton have been lowered. The exports of gold and the less favorable treasury returns for July are not unexpected and means nothing as to coming business. There is a perceptible decrease in the demand for most manufactured products, and the actual distribution to consumers naturally lessens in midsum mer. Much of the recent buying was to anticipate a rise in prices, and such purchases fall off when prices have risen. There are still numerous advances in wages, but strikes grow more numerous and important. In part, because bu-iness was unusu-

large in the first half of July, a quiet tone meets reasonable expecta-The heavy bank failure at Montreal does not effect finances here and is passing there with less disturbance than was feared. Gold exports for the middle of July, when crops are beginning to move if not meant to affect stocks, can at all events have only a speculative significance. Wheat has declined 2 cents for Sep-

tember, corn 1-3 cents and cotton Western receipts of wheat not half of last your's, express disappointment at prices, while exports for the week are are a quarter of 1 st year's, and for three weeks only 2,829.-028 bushels, flour included, as against 7,046,267 last year, show that foreign dealers are not regarding the situation with anxiety. Nor do British accounts indicate any anxiety about cotton, while efforts are reported by some months ago, apparently exceeding their needs for the year. If unfavorable to some speculators, there are cheering indications, for it is better to have fair crops than to get high prices for what Orders have so accumulated in iron

products that some works forego the usual summer rest, and eastern furnaces soon to begin blast will add about 5,000 tons weekly to the production. A few quotations have advanced-gray forge and eastern bar-while Bessemer pig is a shade weaker at Pittsburg, but the averages of all prices is 1 per cent higher for the week and 28.3 per cent higher than Feb. 1. The strike of several thousand miners in the Marquette region may have important consequences. Producers of non-Bessemer ore have sold largely for the future at prices so low that they cannot add to cost of production, and other mines in the northwest may be affected. Minor metals are stronger with sales of 4,000,000 pounds copper up to 11 cents for lake, and tin very firm in spite of a large visible supply.

Wool advanced in the first half of July an average of 1 cent for 104 quotations of domestic by Coates Bros. of Philadelphia, and is now i per cent promptly as did those having drones r lessen than a vear ago. being 1,980,000 pounds for the weak against an average of over 13,000,000 pounds for each of the two previous weeks, but prices are sustained by German and French buying in the London market. Manufacturers do not support the advance and are buying only for immediate needs, but ho ders who have taken for weeks past several times the quantity consumed are strif. Cotton mills continue to enjoy a large business and several have advanced wages this week, but strikes of cons derable importance are threatened or in progress. The weaker tone for the material does not as yet affect the prices of goods

Failures this week have been 256 in the United States against 236 last year, and 39 in Canada against 44 last year.

FIGHT WITH CANADIANS.

American Fishermen Resist Arrest on the Part of Oficials.

Dulith, July 20.-A report comes from Crane Lake of an encounter between American citizens employed by the Arion Fish company, with headquarters at that place, and Canadian officials. The trouble arose over the Canadians taking up and confiscating kerosene. This will work well in dry the nets set in Namekon lake by the weather as long as the furrow is kept in fish company, on the grounds that they were laced in Canadian waters. Eight but a slender line of coal tar poured men belonging to the Arion company started out in search of their nets, when suddenly three boats filled with Lanadian official, darted out from behind an island and pursued them.

The little steamer May Carter, on her way to Crane Lake, came along and Captain Hayes put on all steam to rescue the fishermen. In the excitement the Carter struck one of the Canadam boats, smashing it into pieces and spilling four officials into the lake. Three of the fishermen also fell overboard, but no one was drowned. The Carter picked up all the fishermen except H. E. Fincke, Emit I.mis and William Sim, who were captured by the Canafians and taken to Fort Francis.

Increased Wages Ten Per Cent. IRON MOUNTAIN, Mich., July 20.-The Pewabic Mining company has announced a 10 per cent increase of wages throughout the mine, and it is probable that a number of other mines of this region will follow the example.

Will Boycott a Railroad.

SAVANNAH, July 20.—The Wholesale decided to unite with the association in other cities, in boycotting the Louisville and Nashville road for refusing to give differentials in freight rates.

Placed Under Civil Service Rules. WASHINGTON, July 20.-The presiployes of all pension agencies under that is standing 's

FARMING BY IRRIGATION.

Jottings From the Experience of Farmer In Drought Sections. A Nebraska correspondent of Amor:

can Agriculturist writes as follow-Every farmer who has an ordinarily goo well and wind pump can irrigate one half acre for a family garden and maka success of it by providing a few bar rels or tanks and allowing the roll t rin a few hours lenger than required to pump for his stock. When wanted, con ver this water, warmed by the sun. through pipes, troughs or open ditch, to the point where it will run between the rows. Do not run water over the plants. but moisten the soil, stir before it beken and use teason in the applications water. A neighbor of this correspond to uses a gasoline engine and a No. 5 eet intural pump and inigates 40 acres to a market garden. Others use horsepew ers, gaseline engines or water when: and centrifugal pumps of various sizes subirrigation by building dams are causing the water to stand near the nat ural banks of the stream and spread out under the land to the level of the water about three to six feet below the surfacof creek bettoms is being tried with good results.

A South Dakota farmer contributed this letter: "For several years I have irrigated my garden, orchard, petatoeand a little corn from an arrestan wewhich flows about 20,000 barrels a day I snaply run the water between the rows from a hose or ditch. During the winter I fleod the land in small drains I have had pretty fair success."

From Kansas comes the following 'I have irrigated on a small scale for (years with a common wind pump. On 1-3 acres I have never failed to grey more than enough garden truck to sup ply the needs of two families. We now have fruits of all kinds in abundance from trees and bushes grown by irriga-

A second Kansas correspondent write concerning orchard irrigation. He says The only irrigation I have practiced: to water an orehard of about 1,000 tru trees. I use a 300 gailon tank, mountee on a wagon. The tank is filled by mean of a wind pump. When drought begin to check the growth of the trees, I rabe the dry earth away from the base of the tree to a depth of four to six inches and three or four feet in all directions. then hitch a team to the water wagon draw to the orchard and put 20 to 25 gallons of water around each tree. As soon as it soaks away, and before the surface dries. I rake the dry earth back about the tree, where it acts as a mulch. I have never found it necessary to give more than two such waterings to carry the trees through the driest season. One man will water about 200 trees a day.

Dropes and Swarming. Says a beekeeper of repute in Glean

ings In Bee Culture: There are a few beekeepers who argue that if all drones and drone comb are kept out of the hive it would be, to some extent, a preventive of swarming. but with me I have failed to see that this matter of drones has had anything to do with the matter of swarming whatever, for I have several times had hybrid colonies in my apiary, from which I have taken all drone combs and not allowed them to rear drones because I did not want my young queouto meet such drones. Yet, so far as I could see, these colonies swarmed as From my experience in the past I would say that it is not practical to try to ke all drone comb out of any hive, ba rather have just one frame in each as every have, having from six to twer: square inches of drone comb in it, athave such comb stand in a certain that in each hive, so that the apiarist na know just where it is. Then every t days open the haves from which it is do sired that no drones shall fly and decap itate them, thus making a sure thing the matter and fully satisfying the beas

The Chinch Bug. Fungus disease from the Kansas Ca periment station at Manhattan is quite fatal to chinchbugs, but Professor Forbes the Illinois entomologist, says it won't do to trust to the fungus. As the bugs move from wheat to corn in June or early July he advises plowing a strip 10 feet wide around the cornfield, work an it fine as dust with harrow and brush and running back and forth through the middle a heavy V trough to make a deep furrow with dusty sides up which the bugs will not crawl, but may be collect contain 10, 100 or 1,900 acres each with ed in holes every 20 feet and killed by repair by close watching, hee in harrialong a hardened strip of soil just be youd the furrow will agrest the bugs in wet weather, and they may be caucat | plants begin to head. Apply the poistar in postholes and destroyed, says Ameri either by diluting it with four or five can Agriculturist.

FROM MEADOW TO MOW.

Haying Implements That Save the Back.

Londers and Unloaders. Many hav loaders have been built, all to perform the labor of lifting the hay from the ground upon the load by machinery. Some take the hay directly from the swath; others take it from the windrow and deliver it upon the hind end of the load. The devices fer unloading are more numerous than the leaders. There are forks almost without number, harpoon, double harpoon, grapuell and double grapuell, etc., be-, sides all the different makes of slings. They all work well, but with every one: of them the operator has as much to do with its success as the implement. The right?" slings are well liked. Perhaps thus is because the same implement may be home?" used in handling grain in bundles and also in handling the corn when we wish to get it from the field to the cutter in filling our siles. The slings may be used key? also with the loader by having the rack made with upright pieces at the hind end to which to fasten the slings. When slings are used, it does not pay to try to make each draft too large. It is better , to make the load into four than only three drafts. It may take a mement ; longer to put on the extra sling but it will take less time when unleading, as the team can handle the smaller loads so much more casily. The following description is given by Rural New Yorker of an arrangement

barn over the drive floor four strong pulleys firmly attached to the rafters. In each corner of his hayrack he has made fast a strong ring. By one purlin plate he has put up a heavy shaft, in the middle of which is a drum the diameter of which is six times that of the shaft. To the shaft in four places are made fast four ropes, one of which runs ness: over each pulley and down to the proper height to attach to its corner of the rack. for which purpose it has a strong hook. Over the drum is wound a rope which comes down to the floor and runs under a pulley and to which the team is attached for elevating the load. He drives the load upon the floor, and while the driver removes the team and hitches to the drum rope he hooks a rope to the ring in each corner of the rack. When all is ready, the team, having a purchase of six to one, easily elevates rack, load and all to the height of the mow, and with a proper system of ratchet and dogs it is held there and easily rolled off into the mow. When this is done, by are released, and by a brake applied to

in a barn which has given satisfaction;

The farmer has placed in the roof of his

all is ready for another load. Attention is also called to the cars, which are so made that when the sling or fork is raised to the proper height to pass over the mow the car can be releaswhile the car will run back over the mow wherever desired. East and West Compared.

Professor Sanborn, a pative of New England and now farming in New Hampshire, ofter years of experience in the west, calls attention to the great difference in the productive areas on farms in the two sections. The nine north Atlantic states have an average of while the 12 north Mississippi valley states have on an average 133 acres. But while, at least in many parts of the west, nearly every acre in the farms is cultivatable Professor Sanborn estimates that not more than about onethird of the acreage of New England farms is tillable. The very small percentage of necessarily waste lands on western prairie farms and the convenience and ease of cultivation on them are points greatly in their favor. To have farms without hills or stones, of compact subsoil, when the field may little variation in character of soil, and with no interruption to cultivation, enables the farmers to do the necessary cultivation at a minimum cost.

To Kill the Cabbage Worm. Paris green may be applied until the parts of flour and dusting it on theroughly when the dew is on, or spray the plants with one pound of paris green to Irrigation is destined to revolutioneze | 150 gallons of water, adding two pounds of freshly slaked lime. If the worm are young, there will not often be any occasion to fight them in the headed plants. Some scruple against the use of this poison on cabbages, but there can lays a writer in The Rural New Yorker. Hot water, pyrethrum powder or kero-

Oats and Barley.

One way to save hay is to sow a mixture of oats and barley, using two bushels of oats and one of barley for seed, to be cut and fed green during October and November, it not being injured by frost to any extent, and serving as an excellent fodder after the grass has all been frost killed, not only saving hay at that season, but keeping the cows resort to feeding hay even while the weather is warm enough for cattle to be the lover bashfully. "She says she wants the middle a wide plait of black satin. in the pasture.

Enough. "Do you think, young man, that you can give my daughter all she asks fer?" questioned papa grindy.

'I-aw-think so, sir," murmured only me. "-Tit-Bits.

FASHIONABLE FANCIES.

White Gloves, Sailor Hats and Perishable

There is a fancy in Paris for white gloves stitched with white. The fashion of white gloves, unless they be wash leathwearable they must be immaculate. Noth- 681160; extra No. 8 white, 301/46301/40; mixed, ing looks worse than soiled white gloves. 2012 # 50c. "You have been drinking too much," This revived style is becoming only to small, well shaped hands and should be avoided by women with large extremities. as white gloves, like white shoes, have a magnifying effect. The sailor hat is perennially fashionable

tically untrimmed—that is, when finished with a plain band-but ornamented ones have come more or less to the front for several years past and are seen again this They are not adorned quite like season. those of last summer, which, with their symmetrical bunches and choux, alike to a hair on each side, reminded one of a side wheel steamer. A little diversity is now permitted, and a tall spray or loop breaks

the monotony by standing up on the left side. The plain sailor hat is also worn by women who appreciate the fitness of things and who prefer to put their furbelows on something that is not intended essentially for rough and ready wear. Plain white is much worn this season, as it was last. Whenever it is fashionable comments are made as to its troublesomeness, and it does indeed demand to be kept in the best of order. It is no more delicate, however, than light colors and washes infinitely better, being almost unique in looking as well after it is washed as it did before.

Chiffon parasols are particularly favored this year and are as dainty as could be desired, but are expensive to buy and of short lived beauty, chiffon being a material which is soiled and crumbled almost at a glance. The gown illustrated is of suede faille.

The godet skirt is finished with stitching and opens on the left side over a quille of white faille. The close fitting bodice fastens invisibly on the left side and is slightly rounded away at the throat, where it is adorned with embroidery of suede silk. A large open fichu composed of two wide ruffles of lace covers the shoulders and the upper part of the arms and is held in place at the front of the bodice by two straps of bluet velvet fastened with antique buttons. A large collar of velvet finishes the neck. The sleeves are tight, by a lace ruffle at the wrist. JUDIC CROLLET.

JACKETS AND SKIRTS.

New Coats-How to Line the Fashionable Skirt.

The last departure in jackets shows a decided change of form from that which models are straight and perfectly flat, as if "And you also have a line?" I asked, , they were molded to the figure. The latest "Oh, yes. I sell a sure cure for con- patterns have these straight backs, without even a scam down the middle and no back forms. This smooth expanse of cloth is becoming only to women who have a well rounded waist and hips, but the fashion will no doubt be adopted by everybody

> The skirts of the new jackets are about the same length as those heretofore worn, but look longer because of their extreme flatness. One of these coats has front, sides and back without more fullness than an ordinary waiter's jacket. It is rounded at pointed revers, a turned over collar and the usual big sloeves drooped at the el-

formerly, but instead of stiffening that get a free sample package of this remedy makes them stand out the new linings are at once. If you have indigestion, consofter and make the material bang in stipation, headache, rheumatism, etc., rounded folds Whatever may be reported, wires are not put in the skirts made by the best dress-

makers. Very good linings are employed. alpass or silk instead of cotton, which soon 25%. loses its firmness, and a facing of haircloth about a foot deep. The haircloth is put on so that the horsehair lies horizontally and while the substantial lining gives the skirt body and makes the folds round and rich
